Overview of Results

Melton City Council – 2016 Community Satisfaction Survey Overview Report

Introduction

Metropolis Research was commissioned by Melton City Council to undertake this, its second *Community Satisfaction Survey*.

The survey has been designed to measure community satisfaction with a range of Council services and facilities as well as to measure community sentiment across a range of additional issues of concern in the municipality.

The *Community Satisfaction Survey* program comprises the following core components which are included each year:

- Satisfaction with Council's overall performance and change in performance
- ⊗ Satisfaction with aspects of governance and leadership
- Importance of and satisfaction with a range of Council services and facilities
- ⊗ Issues of importance for Council to address in the coming year
- \otimes Community perception of safety in public areas of Melton
- \otimes Housing related financial stress
- \otimes \qquad Satisfaction with Council customer service
- \otimes Respondent profile.

In addition to these core components that are to be included every year, the *Melton City Council – 2016 Community Satisfaction Survey* includes questions exploring current issues of importance that reflect Council's current requirements. The 2016 survey includes questions related to the following issues:

- ⊗ Preferred methods of receiving / seeking information from Council
- \otimes Sense of community
- ⊗ Visiting local parks, playgrounds or open spaces
- ⊗ Participation in community activities
- ⊗ Participation in organised physical activity
- Output Participation in informal physical activity
- \otimes Council rates

Rationale

The *Community Satisfaction Survey* has been designed to provide Council with a wide range of information covering community satisfaction, community sentiment and community feel and involvement. The survey meets the requirements of the Department of Transport Planning and Local Infrastructure (DTPLI) *Annual Satisfaction Survey* by providing importance and satisfaction ratings for the major Council services and facilities as well as scores for satisfaction with Council overall.

Т

п г

Page 4 of 38

Melton City Council – 2016 Community Satisfaction Survey Overview Report

The *Community Satisfaction Survey* provides an in depth coverage of Council services and facilities as well as additional community issues and expectations. This information is critical to informing Council of the attitudes, levels of satisfaction and issues facing the community in the City of Melton.

In addition, the *Community Satisfaction Survey* includes a range of demographic and socioeconomic variables against which the results can be analysed including age structure, period of residence, language, gender and household structure. These variables have been included to facilitate in-depth analysis of the results of the survey by demographic profile and also to ensure that the sample selected represents the underlying population of the City of Melton.

Methodology

The *Melton City Council – 2016 Community Satisfaction Survey* was conducted as a door-todoor interview style survey of 800 households drawn in equal numbers from across the nine precincts comprising the municipality during the months of March and April 2016.

Trained Metropolis Research survey staff conducted face to face interviews of approximately twenty minutes duration with householders, during daylight hours at weekends. This methodology has produced highly consistent results in terms of the demographics surveyed, although it is noted that face-to-face interviews will tend to slightly over represent families, in particular parents with younger children.

Response rate and statistical significance

A total of approximately 4,659 households were approached by Metropolis Research to participate in the *Melton City Council – 2016 Community Satisfaction Survey*. Of these households, 2,294 were unattended at the time, 1,566 refused to participate and 800 completed surveys. This provides a response rate of 33.8%, which is slightly lower than that of 34.1% in 2014.

The 95% confidence interval (margin of error) of these results is plus or minus 3.4%, at the fifty percent level. In other words, if a yes / no question obtains a result of fifty percent yes, it is 95% certain that the true value of this result is within the range of 46.5% and 53.5%. This is based on a total sample size of 800 respondents, and an underlying population of the City of Melton of 136,587.

Governing Melbourne

1 Г

Г

п г

Governing Melbourne is a community survey conducted independently on an annual basis by Metropolis Research since 2010.

Governing Melbourne is a community satisfaction and attitudinal survey of approximately one thousands respondents drawn in equal numbers from every municipality in metropolitan Melbourne. The survey includes measures of the importance and satisfaction with council provided services and facilities, governance and leadership, customer service, planning, overall performance.

Page 5 of 38

Item 12.5Metropolis and JWS Household Survey Results 2016Appendix 1Metropolis Household Customer Satisfaction Survery 2016 -
Overview of Results

Melton City Council – 2016 Community Satisfaction Survey Overview Report

Mattopski ning E ded. n to E

The survey also identifies the top issues for local government to address in the coming year, as well as a range of other topics. A range of other questions are also included. *Governing Melbourne* provides an objective, consistent and reliable basis on which to compare the results of the *Melton City Council – 2016 Annual Community Survey*.

This report provides some comparisons against the metropolitan Melbourne average, which includes all municipalities located within Greater Melbourne (Greater Capital City Statistical Area) as well as the western region, which includes the municipalities of Maribyrnong, Hobsons Bay, Wyndham, Brimbank, Melton, and Moonee Valley.

Glossary of terms

Precinct

The term precinct is used by Metropolis Research to describe the small areas and in this instance reflects the official suburbs within Melton. Readers seeking to use precinct results should seek clarification of specific precinct boundaries if necessary.

Measurable

A measurable difference is one where the difference between or change in results is sufficiently large to ensure that they are in fact different results, i.e. the difference is statistically significant. This is due to the fact that survey results are subject to a margin of error or an area of uncertainty.

Statistically significant

Statistically significant is the technical term for a measurable difference as described above. The term "statistically significant" and the alternative term "measurable" describe a quantifiable change or difference between results. They do not describe or define whether the result or change is of a sufficient magnitude to be important in the evaluation of performance or the development of policy and service delivery.

Significant result

Metropolis Research uses the term *significant result* to describe a change or difference between results that Metropolis Research believes to be of sufficient magnitude that they may impact on relevant aspects of policy development, service delivery and the evaluation of performance and are therefore identified and noted as significant or important.

Discernible / observed

Metropolis Research will describe some results or changes in results as being discernible, observable or notable. These are not statistical terms rather they are interpretive. They are used to draw attention to results that may be of interest or relevance to policy development and service delivery. These terms are often used for results that may not be statistically significant due to sample size or other factors but may none-the-less provide some insight.

ORDINARY MEETING OF COUNCIL Item 12.5 Metropolis and JWS Household Survey Results 2016

Appendix 1

Metropolis Household Customer Satisfaction Survery 2016 -**Overview of Results**

Melton City Council – 2016 Community Satisfaction Survey Overview Report

95% confidence interval and standard deviation

Average satisfaction results are presented in this report with a 95% confidence interval included. These figures reflect the range of values within which it is 95% certain that the true average satisfaction falls. The 95% confidence interval is displayed in this report as the "upper" and "lower" values around the mean in satisfaction tables.

Satisfaction categories

Metropolis Research categorises satisfaction results to assist in the understanding and interpretative of the results. These categories have been developed as a guide to the scores presented in the report and are designed to give a general context. They are generally defined as follows:

\otimes	Excellent:	Scores of 7.75 and above are categorised as excellent
\otimes	Very good:	Scores of 7.25 to less than 7.75 are categorised as very good
\otimes	Good:	Scores of 6.5 to less than 7.25 are categorised as good
\otimes	Solid:	Scores of 6 to less than 6.5 are categorised as solid
\otimes	Poor:	Scores less than 6 are categorised as poor
\otimes	Very Poor:	Scores of less than 5.5 are categorised as very poor

Precincts

This report provides results at both the municipal and precinct level. The precincts are consistent with those used for the Melton Community Profile prepared by i.d consulting. The precincts used in this report are as follows:

Precincts within Melton Township:

Г

л г

п г

Precincts at the urban fringe:

Melton precinct	Burnside
Melton West	Caroline Springs
Kurunjang	Hillside
Melton South / Brookfield	Taylors Hill

The rural precinct includes the rural balance and the rural townships of Diggers Rest, Toolern Vale, Eynesbury and Rockbank.

The very small populations of the rural townships necessitate their consolidation into one precinct in order to be able to provide statistically reliable results for them as a grouped precinct.

Item 12.5Metropolis and JWS Household Survey Results 2016Appendix 1Metropolis Household Customer Satisfaction Survery 2016 -
Overview of Results

Melton City Council – 2016 Community Satisfaction Survey Overview Report

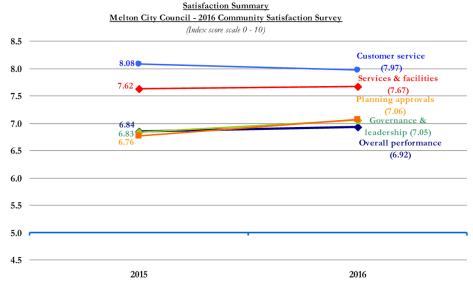

Summary of results

Metropolis Research, in this its second *Community Satisfaction Survey* for the City of Melton, continues to find that the community is generally satisfied with the performance of Melton City Council, recording for the second consecutive year, a "good" level of satisfaction with the performance of Melton City Council.

Satisfaction with Council's overall performance increased 2.3% in 2016, although the increase was not statistically significant. Satisfaction with the combined aspects of governance and leadership increased somewhat more, up 3.2% in 2016.

This relatively high satisfaction was recorded across the board range of Council services, facilities, governance and the leadership of Council in the community.

The services of most importance to the community include the community services (services for people with a disability, seniors, children, young people, and health services for babies, infants and toddlers), the waste and recycling services, and the library service. It is very important to note that these services were also typically the services with which the community is most satisfied.

It was found that satisfaction with Melton City Council was generally recorded at levels higher than the 2015 metropolitan Melbourne and the western region averages. This report will be updated with the 2016 metropolitan Melbourne and western region averages as the results of *Governing Melbourne* become available.

Metropolis Research notes that the average importance of the council services and facilities increased by two percent in 2016. We are of the view that this increase in average importance is likely to reflect, at least in part, the generalised increase in a positive outlook on the performance of Council. Respondents appear to have been in a more positive mindset in relation to the activities of the City of Melton in 2016 compared to 2015, and this is likely to have flowed-through to a generalised increase in

Page 8 of 38

ТГ

п г

Melton City Council - 2016 Community Satisfaction Survey Overview Report

the importance scores. It is important to bear in mind that the importance scores reflect how important the respondents consider each of the included Council services and facilities are to the community, and are not a measure of their expectation of Council performance in providing those services and facilities. Therefore these results show that the community views these services and facilities as more important, and that they are also more satisfied with Council's provision of these services and facilities.

There was meaningful variation in satisfaction with the performance of Council recorded across the municipality; with respondents from Caroline Springs in particular tending to be more satisfied with many aspects of Council performance, whilst the rural precinct (including the rural townships such as Rockbank, Toolern Vale, Diggers Rest and Eynesbury) tended to record lower than average satisfaction for many aspects of performance. Metropolis Research has observed this result in other urban fringe municipalities including the Shire of Nillumbik and the City of Whittlesea, whereby residents in the rural areas of the municipality are less satisfied than those in the urban areas. This clearly reflects at least in part, a perceived lower level of service delivery and infrastructure provision in the less densely populated rural and semi-rural areas.

There was relatively little variation in satisfaction across the community, with male and female respondents similarly satisfied with Council's performance. It was observed however that senior citizens and adolescents tended to be more satisfied than average.

The most commonly identified issues for Council to address in the next twelve months are similar to those reported in 2015; including traffic management (29.8%), parks, gardens and open space issues (11.9%), public transport (9.6%), and road maintenance and repair related issues (9.6%). It is of note that not all of these issues are within the remit of local government, and it is clear that the community seeks resolution of these issues via Council taking a leading role in advocating for the community in relation to these issues (such as roads and traffic management) with other levels of government.

The sense of community in the City of Melton remains relatively strong, with very strong agreement that the Melton community is a child-friendly community, accepting of people from diverse cultures and backgrounds, and an age-friendly community.

Respondents were still solidly, but not strongly in agreement that the Melton community is an active community in which people get involved and do things, that people locally can be trusted, and that they personally feel part of the local community.

These sense of community results varied substantially across the municipality, with particular attention drawn to respondents from Caroline Springs who tended to reflect a relatively stronger sense of community, whilst respondents from Kurunjang tended to reflect a relatively weaker sense of community. Whilst it is difficult to easily explain the lower than average sense of community in Kurunjang, the higher than average sense of community in caroline Springs is reflecting the stronger sense of community that often develops as a new housing area develops a more mature structure, and as services and facilities develop in the area, which can be drivers of a stronger sense of community.

The demographic profile of respondents in 2016 was very consistent with that recorded in 2015, although twenty-seven respondents (3.4% up from 2.2%) identified as Aboriginal or Torres Strait Islander in 2016. This is higher than the 0.7% recorded in 2011 *Census*, which is likely to reflect random chance rather than methodological issues.

Item 12.5Metropolis and JWS Household Survey Results 2016Appendix 1Metropolis Household Customer Satisfaction Survery 2016 -
Overview of Results

Melton City Council – 2016 Community Satisfaction Survey Overview Report

Key findings

The following outlines the key findings from the *Melton City Council – 2016 Community Satisfaction Survey* for each section of the survey.

Overall performance

- ⊗ Satisfaction with Council's overall performance in 2016 was rated at 6.92 out of a potential ten, a level of satisfaction best categorised as "good", and an increase of 1.2% on the 2015 average of 6.84.
- \otimes This score was marginally higher than the 2015 metropolitan Melbourne (6.81) and measurably higher than the western region (6.47) averages from *Governing Melbourne*.
- ⊗ Respondents from Caroline Springs (7.26) were measurably and significantly more satisfied with Council's overall performance than the municipal average, rating satisfaction as "very good".
- ⊗ Respondents from the rural precinct (6.28) were measurably and significantly less satisfied with Council's overall performance than the municipal average, rating satisfaction as "solid".
- $\otimes~8.1\%$ of respondents were dissatisfied (rating satisfaction less than five) with Council's overall performance.
- $\otimes\,$ Just over half of the respondents (50.4%) were neutral to somewhat satisfied (rating satisfaction five to seven).
- \otimes More than two-fifth of respondents (41.5%) were very satisfied (rating satisfaction eight or more).
- \otimes Younger respondents (7.48) were measurably more satisfied than the municipal average.
- ⊗ Approximately one-fifth (18.5% up from 16.5%) of respondents considered that Council's overall performance had improved in the last 12 months, compared to 7.5% (up from 5%) of respondents who considered that it had deteriorated.

Governance and leadership

- \otimes The average satisfaction with the six aspects of governance and leadership was rated at 7.05 (up from 6.83) in 2016. This result was significantly and measurably higher than metropolitan Melbourne (6.67) average and the western region (6.79) average as recorded in the 2015 *Governing Melbourne*.
- \otimes Satisfaction with the seven aspects of governance and leadership can best be summarised as follows:

	Meeting its environmental responsibilities Representation, lobbying and advocacy Community consultation and engagement Responsiveness to local community needs Maintaining trust and confidence Making decisions in interests of community	(7.38 down from 7.40) (7.09 up from 6.72) (7.02 up from 6.73) (7.01 up from 6.79) (6.91 up from 6.70) (6.89 up from 6.75)	"very good" "good" " " "	[[[

Г

Melton City Council - 2016 Community Satisfaction Survey Overview Report Issues for Melton City Council to address in the coming year \otimes A total of 1,227 responses were obtained from 623 respondents (77.8% up from 74.7%). The top six issues for the City of Melton identified by respondents were: \otimes Traffic management (29.8 % up from 20.8%) 0 0 Parks, gardens and open space (11.9% up from 10.4%) 0 Public transport (9.6% down from 12.1%) Roads maintenance and repairs (9.6% up from 7.4%) 0 Safety, policing and crime issues (8.8% down from 9.9%) 0 Hard rubbish collection (8.8% up from 5.4%). 0 Perceptions of safety in public areas

- ⊗ The perception of safety in public areas of Melton was rated relatively high, as follows:
 - 0 In public areas during the day
 - In and around Caroline Springs S.C 0
 - 0 In and around Woodgrove S.C
 - 0 In and around local shopping area
 - 0 At local community events
 - o In and around High St. Melton
 - Travelling on / waiting for public transport 0
 - 0 In public areas at night

Housing related financial stress

- \otimes Of the 413 respondents from rental and mortgagee households, 47.5% (down from 51.5%) reported that they experience some level of housing related financial stress:
 - 0 Rental households (51.2% up from 43.9%)
 - Low stress (17.1% down from 18.1%), moderate stress (14.4% down from 19.7%), heavy stress (5.4% down from 6.1%)
 - 0 Mortgagee households (53.1% down from 54.6%)
 - Low stress (16.5% down from 21.4%), moderate stress (29.0% up from 23.0%), heavy stress (7.6% down from 10.2%).

Planning and housing development

1 Г

- г

пΓ

- Less than five percent of respondents reported being personally involved in planning \otimes in the last 12 months (3.0% as applicants and 0.9% as objectors)
- \otimes Average satisfaction with planning and housing development was 7.06 in 2016, up on the 6.76 recorded in 2015 and is categorised as "good". This was measurably higher than the western region average of 6.84 and significantly and measurably higher than the metropolitan Melbourne average (6.46) from the 2015 Governing Melbourne.

Item 12.5Metropolis and JWS Household Survey Results 2016Appendix 1Metropolis Household Customer Satisfaction Survery 2016 -
Overview of Results

Overview of Results
Melton City Council – 2016 Community Satisfaction Survey Overview Report
 Maintaining local heritage (7.32, up from 7.08) "very good" Appearance and quality of new developments (7.12, up from 6.91) "good" Effectiveness of community consultation (6.96, up from 6.73) " Opportunities to participate in strategic planning (6.84 up from 6.30) ".
Preferred methods of receiving or seeking information from Council
 Almost all respondents identified at least one method by which they would like to receive or seek information from Council, identifying an average of approximately three methods each. The top five methods were: Articles in the local newspaper Council's website Direct mail / letterbox drop of printed material Social media Council's quarterly printed newsletter
Council rates
Solution Two-thirds (63.6%) of respondents preferred that other levels of government fund any service and infrastructure gaps that may result from Council's rates being capped.
Sense of community

- Average agreement with the ten community related aspects of the sense of community was rated at 7.31 (down from 7.40) out of a potential ten. Agreement with these ten statements can best be summarised as follows:
 - *Very Strong* agreement with each of Melton is a child-friendly community and the Melton community is accepting of people from diverse cultures.
 - Strong agreement with each of Melton is an age-friendly community, in times of need, I / we could turn to the neighbours for help, there are adequate opportunities to socialise and meet people in the local area, Melton is accessible and inclusive for people with a disability, my / our neighbourhood has a distinct character, it's a special place.
 - Solid agreement that I / we feel part of the local community and most people in my local community can be trusted, and it's an active community; people do things and get involved in local issues.

Page 12 of 38

Matopslig

Melton City Council – 2016 Community Satisfaction Survey Overview Report

- Average agreement with the ten services and facilities related aspects of the sense of community were rated at 6.62 (down from 7.10) out of a potential ten. Agreement with these ten statements can best be summarised as follows:
 - Strong agreement that there is access to adequate primary and secondary schools locally, the community has access to adequate health services, the community has access to adequate community services, it's easy to find out what services are available to me / us, it's easy to find out about activities and events available locally.
 - *Solid agreement* that there are opportunities to have a real say on issues that are important to me, there is access to affordable and efficient public transport, and there is access to adequate tertiary education opportunities.
 - *Mild agreement* that there are adequate local opportunities, and there is public transport that goes where I need to go.

Participation in community activities

- ⊗ Almost two-thirds of respondents (63.3%) participated in at least one of the eleven included types of community activities. The top five activities were as follows:
 - Sports / leisure events
 - Local community festivals
 - $\circ \quad \text{School events} \ / \ \text{fetes}$
 - Arts / cultural events
 - Information centres

(27.1%, down from 29.1%) (23.1%,, down from 32.8%) (18.6%, down from 20.5%) (14.9%, down from 32.3%) (13.9%, up from 6.3%).

Visiting local parks, playgrounds or open spaces

⊗ The overwhelming majority (80.3%) of respondents providing a response reported that they visit local parks, playground and open spaces at least monthly, with approximately two-thirds (63.7%) of the respondents visiting at least weekly.

Participation in organised physical activity

⊗ A little more than half (58.8%) of respondents reported that they participate in organised physical activity at least monthly, with a little less than half (44.8%) participating at least weekly.

Participation in informal physical activity

л г

Г

п г

 \otimes The overwhelming majority (80.8%) of respondents reported that they participate in informal physical activity at least monthly, with almost two-thirds (65.0%) participating at least weekly.

Page 13 of 38

Melton City Council – 2016 Community Satisfaction Survey Overview Report

Access community services and support

⊗ A little less than one-sixth of respondents (15.2% up from 9.5%) reported that there were services or support they required but could not access locally. The two most common services or support were medical facilities (including hospital) (33 comments) and sports, leisure and recreation facilities (27 comments).

Involvement in the local community

 \otimes Approximately one-sixth (18.6%) of respondents reported that they are an active member of a club or community group, and a little less than one-sixth (13.4%) reported that they volunteer regularly.

Food security

- \otimes Approximately five percent of respondents (5.2% up from 4.3%) reported that their household had run out of food at least once in the last twelve months and couldn't afford to buy more:
 - o Once
 - A couple of times
 - Monthly or almost every month
 - More than once a month

(1.4% up from 0.6%) (2.4% down from 3.0%) (1.0% up from 0.4%) (0.4% up from 0.3%).

1 Г

пг

Customer service

0

- $\otimes~$ More than one-third of the respondents (38.3% down from 40.2%) contacted Council in the last year.
- \otimes The main forms of contact were by telephone (61.3%) and visits in person (28.2%).
- \otimes Internet based method was identified by 6.3%, similar to other municipalities.
- ⊗ Average satisfaction with customer service was 7.97 (down from 8.08), a level categorised as "excellent", slightly higher than the western region average of 7.82 and metropolitan Melbourne average of 7.69 from the 2015 *Governing Melbourne*.

0	Understand language needs	(8.71, up from 8.39)	"excellent"
0	General reception	(8.11, down from 8.40)	"excellent"

0	Courtesy of service	(8.03, down from 8.16)	"excellent"
0	Access to relevant officer	(7.89, down from 8.33)	"excellent"
0	Provision of information	(7.79, down from 7.83)	"excellent"
0	Care and attention to enquiry	(7.76, up from 7.70)	"very good"
0	Speed of service	(7.39, down from 7.53)	"very good"

ORDINARY MEETING OF COUNCIL Metropolis and JWS Household Survey Results 2016 Item 12.5 Appendix 1 Metropolis Household Customer Satisfaction Survery 2016 -**Overview of Results**

Melton City Council - 2016 Community Satisfaction Survey Overview Report

Importance of Council services and facilities

- \otimes The average importance of the thirty-six services and facilities was 8.94 (up from 8.75) out of a potential ten, measurably higher than the metropolitan Melbourne (8.53) from the 2015 Governing Melbourne.
- \otimes The five most important services in 2016:

	0	Services for people with a disability	(9.46 up from 9.30)
	0	Services for children	(9.42 up from 9.24)
	0	Regular recycling	(9.40 up from 9.24)
	0	Services for seniors	(9.39 up from 9.18)
	0	Regular garbage collection	(9.39 up from 9.28).
\otimes	The fiv	e least important services in 2016:	

Council's quarterly printed newsletter 0

0	Council's quarterly printed newsletter	(7.91 up from 7.70)
0	Council information & columns in local papers	(8.32 up from 8.04)
0	Council's activities promoting local eco. develop.	(8.34 down from 8.43)
0	Council's website	(8.35 up from 8.19)
0	Parking enforcement	(8.42 up from 8.14).

0 Parking enforcement

Satisfaction with Council services and facilities

 \otimes The average satisfaction with the thirty-six services and facilities was 7.67 (up from 7.62) out of a potential ten, a level of satisfaction best categorised as "very good". This result is broadly consistent with metropolitan Melbourne (7.36) and the western region (7.48) results.

\otimes The five services with the highest satisfaction in 2016:

0	Regular garbage collection	(8.87 up from 8.68)	"excellent"
0	Regular recycling	(8.70 up from 8.64)	"
0	Local library	(8.68 up from 8.66)	"
0	Green waste collection	(8.63 up from 8.70)	"
0	Services for seniors	(8.28 up from 8.15)	".

 \otimes The five services with the lowest satisfaction in 2016:

Item 12.5 Metropolis and JWS Household Survey Results 2016 Appendix 1 Metropolis Household Customer Satisfaction Survery 2016 -Overview of Results 25 JULY 2016

The 2016 *Governing Melbourne* research is currently being undertaken and the 2016 results will be incorporated into this report when they become available.

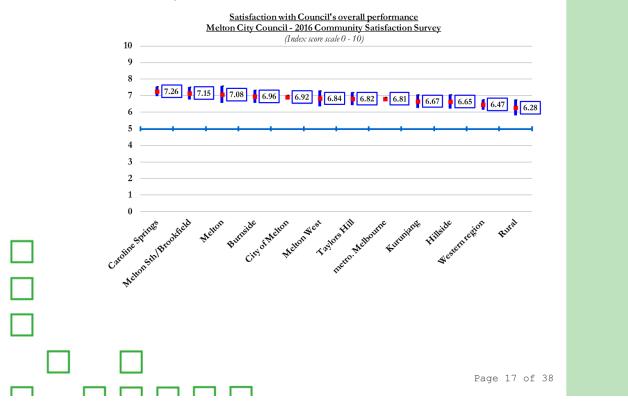

Page 16 of 38

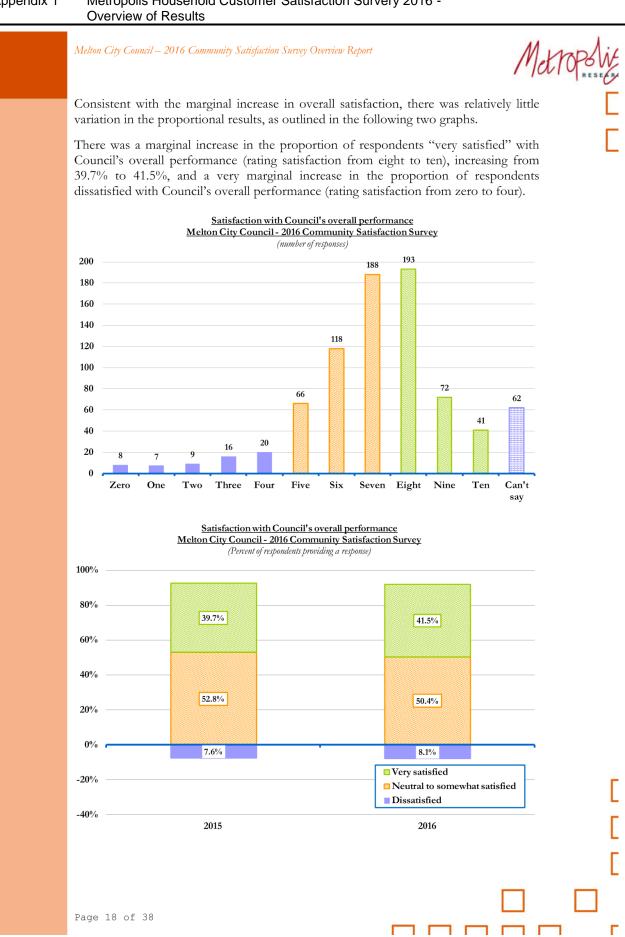

There was measurable variation in satisfaction with the performance of Council across all areas of responsibility recorded across the nine precincts comprising the City of Melton, with attention drawn to the following:

- ⊗ *Caroline Springs* respondents were measurably and significantly more satisfied with Council's overall performance than the municipal average, and rated satisfaction at a level categorised as "very good".
- Rural precinct respondents were measurably and significantly less satisfied with Council's overall performance than the municipal average, and rated satisfaction at a level categorised as "solid".

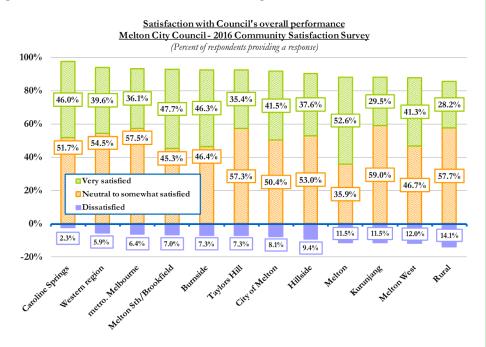

Item 12.5Metropolis and JWS Household Survey Results 2016Appendix 1Metropolis Household Customer Satisfaction Survery 2016 -
Overview of Results

Melton City Council – 2016 Community Satisfaction Survey Overview Report

There was some variation in the proportional satisfaction results across the municipality, as outlined in the following graph. It is observed that more than ten percent of respondents from Melton precinct, Kurunjang, Melton West, and the rural precinct were dissatisfied with Council's overall performance.

Overall performance by respondent profile

л г

г

Г

п п

The following table provides a comparison of satisfaction with Council's overall performance by respondent profile. There was some variation observed in these results, with attention drawn to the following:

- ⊗ Younger respondents (aged 15 to 34 years) were measurably more satisfied with Council's overall performance.
- Senior citizens (aged 75 years and over) were significantly, albeit not measurably more satisfied with Council's overall performance.
- ⊗ Female respondents were measurably and significantly more satisfied with Council's overall performance than male respondents.
- ⊗ *Household member with a disability* respondents from households with a member with a disability were notably, albeit not measurably less satisfied than other respondents.
- Rental household respondents were measurably more satisfied than average with Council's overall performance.
- ⊗ *New residents (less than one year)* were measurably and significantly more satisfied with Council's overall performance than the municipal average.

Melton City Council – 2016 Community Satisfaction Survey Overview Report

Change in Council's overall performance

Respondents were asked:

Г

пΓ

п г

"Over the past twelve months, do you think Melton City Council's overall performance has improved, deteriorated or stayed the same?"

There was a significant increase in 2016 in the proportion of respondents able to provide a response as to whether Council's overall performance had improved, stayed the same or deteriorated. In 2015 more than one-fifth (21.6%) of respondents were unable to say, compared to just 10.9% in 2016.

There was relatively little meaningful variation in the ratio of respondents considering that Council's overall performance had improved compared to those who considered that performance had deteriorated. In 2015 3.3 times as many respondents considered that performance had improved as those who considered it had deteriorated. In 2016, this had declined a little to 2.5 times as many considering performance had improved as those who considered it had deteriorated.

By way of comparison, the 2015 *Governing Melbourne* research found that 12.5% of respondents across metropolitan Melbourne considered that their local council's overall performance had improved in the last twelve months, somewhat lower than the 18.5% recorded for the City of Melton. In 2015 5.5% of respondents across metropolitan Melbourne considered that their local council's overall performance had deteriorated, marginally lower than the 7.5% recorded for the City of Melton.

Change in Council's overall performance Melton City Council - 2016 Community Satisfaction Survey

(Number and	percent of total	' respondents)
-------------	------------------	----------------

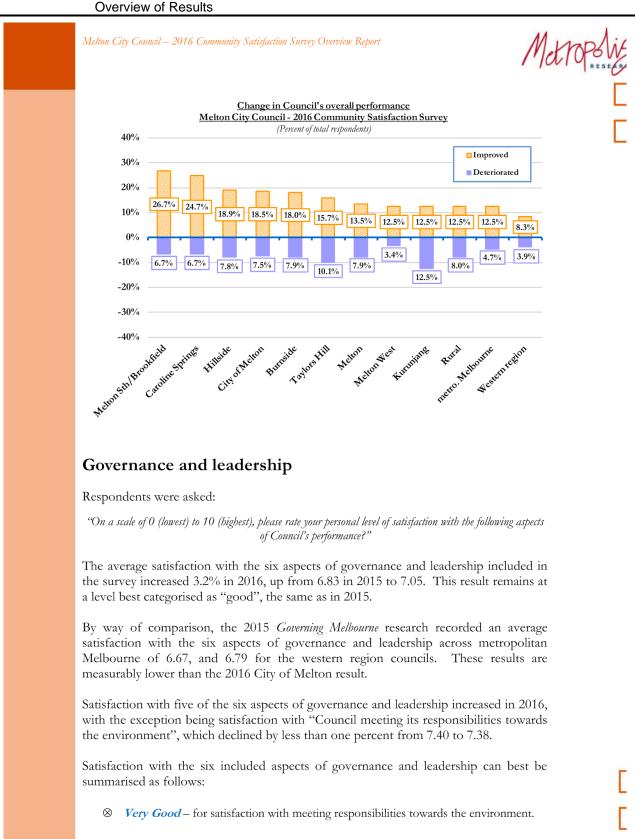

Result	20	16	2015	Male	Female
<u>K</u> esuu	Number	Percent	2015	<i>wiale</i>	1'emaie
Improved	148	18.5%	16.5%	21.1%	16.0%
Stayed the same	505	63.1%	56.9%	60.2%	65.9%
Deteriorated	60	7.5%	5.0%	8.9%	6.0%
Can't say	87	10.9%	21.6%	9.8%	12.1%
Total	800	100%	800	402	395

There was some variation in these results across the nine precincts comprising the City of Melton, with attention drawn to the following:

- Melton South / Brookfield respondents were more likely than average to consider that Council's performance had improved in the last twelve months.
- ⊗ *Melton West, Kurunjang* and *rural precinct* respondents were somewhat, albeit not measurably less likely than average to consider that performance had improved in the last year.
- 8 *Kurunjang* respondents were somewhat, albeit not measurably more likely than average to consider that Council's overall performance had deteriorated in the last year.

Page 22 of 38

Г

1 Г

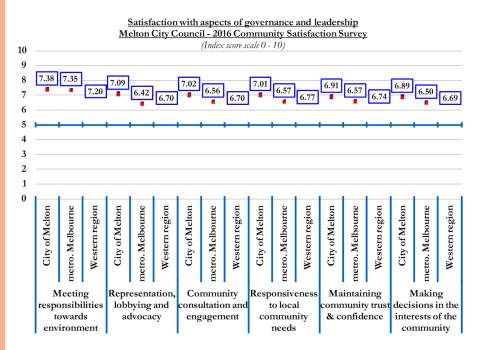

The increase in satisfaction with "representation, lobbying, and advocacy" was statistically significant, whilst the increase for the other four aspects of governance and leadership was not statistically significant.

Item 12.5Metropolis and JWS Household Survey Results 2016Appendix 1Metropolis Household Customer Satisfaction Survery 2016 -
Overview of Results

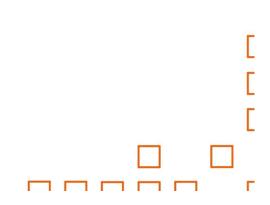

Melton City Council – 2016 Community Satisfaction Survey Overview Report

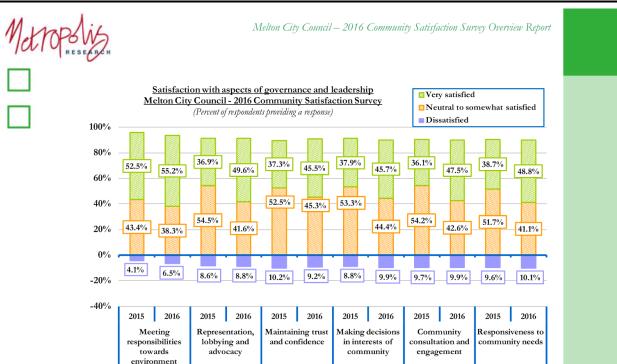

The average satisfaction with each of the six included aspects of governance and leadership was higher in the City of Melton in 2016 than the 2015 metropolitan Melbourne average satisfaction recorded in *Governing Melbourne*. With the exception of "Council meeting its responsibilities towards the environment", this higher level of satisfaction was statistically significant.

Consistent with the increase in average satisfaction with five of the six aspects of governance and leadership, there was a significant increase in the proportion of respondents "very satisfied" with five of the six aspects. There was only a small increase in the proportion of respondents very satisfied with Council's performance meeting its responsibilities towards the environment (up from 52.5% to 55.2%).

Attention is again in 2016 drawn to the fact that no more than approximately ten percent of respondents were dissatisfied with each of the six aspects of governance and leadership. This is very consistent with the proportion of dissatisfied respondents recorded in 2015.

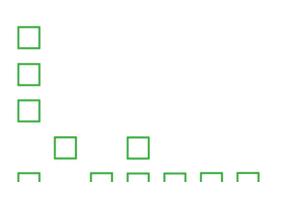

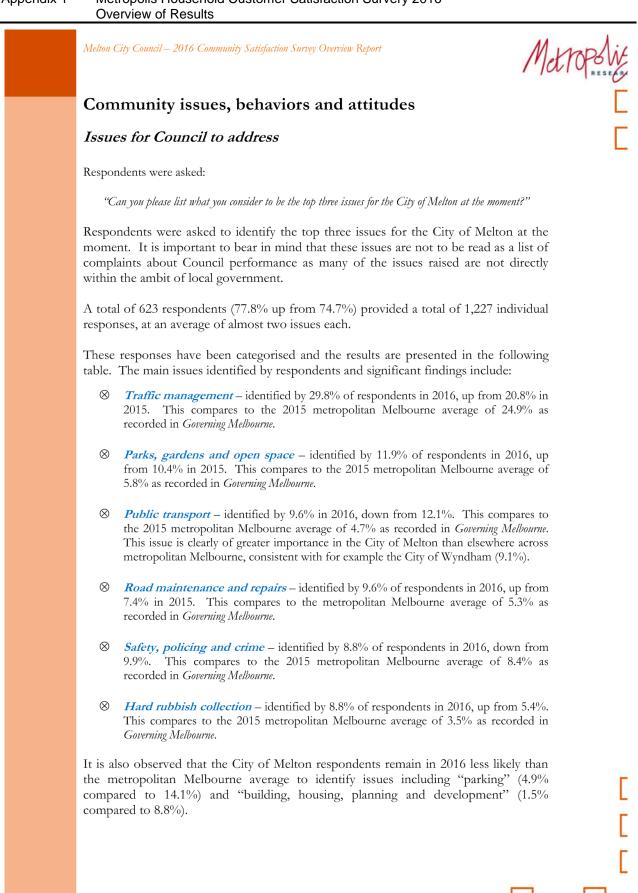

The following section provides a breakdown of satisfaction with each of the six aspects of governance and leadership by precinct and respondents' age structure and gender.

Metropolis Research notes that there is a consistent theme across these precinct-level results, with respondents from Caroline Springs reporting measurably higher than average satisfaction with most aspects, and respondents from the rural precinct reporting measurably lower than average satisfaction.

There tends to be some measurable variation in satisfaction with the six aspects of governance and leadership by respondents' age structure, with younger respondents (aged up to 35 years) tending to rate satisfaction lower than respondents from 35 to 74 years. It is also noted that female respondents tend to be more satisfied than were male respondents.'

Melton City Council – 2016 Community Satisfaction Survey Overview Report

There was some variation in these results across the nine precincts comprising the City of Melton, with attention drawn to the following:

- ⊗ *Melton precinct* respondents were somewhat more likely than average to identify cleanliness and maintenance of the area.
- So *Kurunjang* respondents were somewhat more likely than average to identify parking.
- Melton West respondents were measurably more likely than average to identify road maintenance and repairs, and somewhat more likely than average to identify footpath maintenance and repairs.
- Melton South / Brookfield respondents were measurably more likely than average to identify traffic management and public transport.
- ⊗ *Caroline Springs* respondents were measurably more likely than average to identify traffic management.
- ⊗ *Burnside* respondents were somewhat more likely than average to identify the provision and maintenance of general infrastructure.
- ⊗ *Taylors Hill* respondents were measurably more likely than average to identify hard rubbish collection, and somewhat more likely than average to identify rates.
- ⊗ *Hillside* respondents were somewhat more likely than average to identify cleanliness and maintenance of the area, and rubbish and waste issues.
- ⊗ *Rural precinct* respondents were measurably more likely than average to identify road maintenance and repairs.

Metropolis

Melton City Council – 2016 Community Satisfaction Survey Overview Report

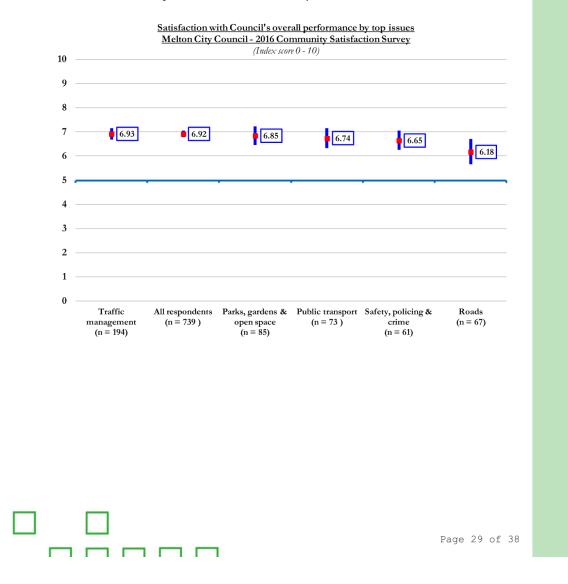

Correlation between issues and satisfaction with Council's overall performance

The following graph provides the average satisfaction with Council's overall performance of respondents identifying each of the top five issues.

It is clear from the graph that respondents identifying the issues of traffic management and parks, gardens and open spaces rated satisfaction very similar to the municipal average.

Respondents identifying public transport and safety, policing and crime issues on average rated satisfaction somewhat, albeit not measurably lower than the municipal average satisfaction.

Respondents identifying road maintenance and repair issues rated satisfaction with Council's overall performance measurably and significantly lower than the municipal average. This strongly suggests that this issue is negatively influencing community satisfaction with the performance of Melton City Council.

None of these changes were statistically significant.

Satisfaction with the eight included aspects of customer service can best be summarised as follows:

- Excellent for staff understanding language needs (NESB respondents only), general reception, opening hours, courtesy of service, access to relevant officer / area, provision of information, and care and attention to enquiry.
- ⊗ *Very Good* for speed of service.

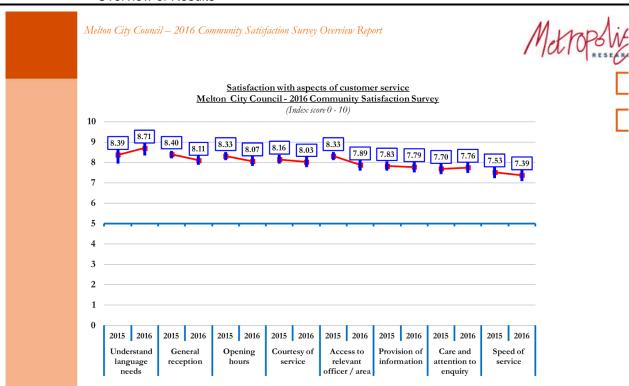

л г

Г

Page 31 of 38

Item 12.5Metropolis and JWS Household Survey Results 2016Appendix 1Metropolis Household Customer Satisfaction Survery 2016 -
Overview of Results

The following graph provides a breakdown of these results into those dissatisfied (rating zero to four), neutral to somewhat satisfied (five to seven), and very satisfied (eight to ten).

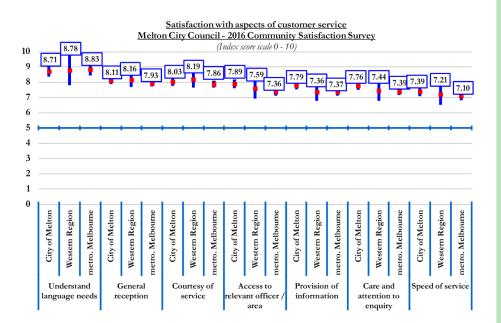

Attention is drawn to the fact that two-thirds or more of respondents were very satisfied with each of the eight aspects of customer service, and that with the exception of "speed of service", less than ten percent of respondents were dissatisfied with any of the eight aspects.

Melton City Council – 2016 Community Satisfaction Survey Overview Report

The following graph provides a comparison of these results against the 2015 western region and metropolitan Melbourne average as recorded in *Governing Melbourne*.

It is observed that respondents in the City of Melton were marginally more satisfied with each of the eight included aspects of customer service than either the western region or metropolitan Melbourne averages from *Governing Melbourne*.

Council services and facilities

п г

Г

٦Г

٦

Respondents were asked:

"On a scale of 0 (lowest) to 10 (highest), can you please rate the importance to the community, and your personal level of satisfaction with each of the following Council provided services?"

Respondents were asked to rate the importance to the community of thirty-six services and facilities provided by Council.

These services were broken into two groups; seventeen core services and facilities and nineteen client services and facilities that are typically used by only a subset of the community.

Respondents were asked to rate their level of satisfaction with each of the seventeen core services and facilities, and satisfaction with each of the nineteen client services or facilities that they or members of their household had personally used in the last twelve months.

Page 33 of 38

PSW RESEAR

Melton City Council - 2016 Community Satisfaction Survey Overview Report

Importance of selected services and facilities

The average importance of the thirty-six included Council services and facilities was rated at 8.94 in 2016, an increase of 2.2% on the 8.75 recorded in 2015.

The top nine services and facilities were measurably more important than average, whilst the bottom eight services and facilities were measurably less important than average.

Melton City Council - 2016 Community Satisfaction Survey Overview Report

Satisfaction with services and facilities

The average satisfaction with the thirty-six included Council services and facilities was 7.67 in 2016, an increase of less than one percent on the 7.62 recorded in 2015. This result is measurably higher than the 2015 metropolitan Melbourne average of 7.36, and is best categorised as "very good", the same categorisation as recorded in 2015.

Satisfaction with the top nine services and facilities was measurably higher than average, whilst satisfaction with the bottom ten services and facilities was measurably lower.

Satisfaction with selected services and facilities Melton City Council - 2016 Community Satisfaction Survey

пΓ

Г

Page 35 of 38

Item 12.5Metropolis and JWS Household Survey Results 2016Appendix 1Metropolis Household Customer Satisfaction Survery 2016 -
Overview of Results

25 JULY 2016

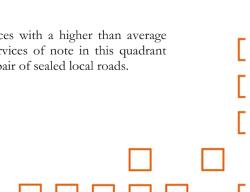

Importance and satisfaction cross tabulation

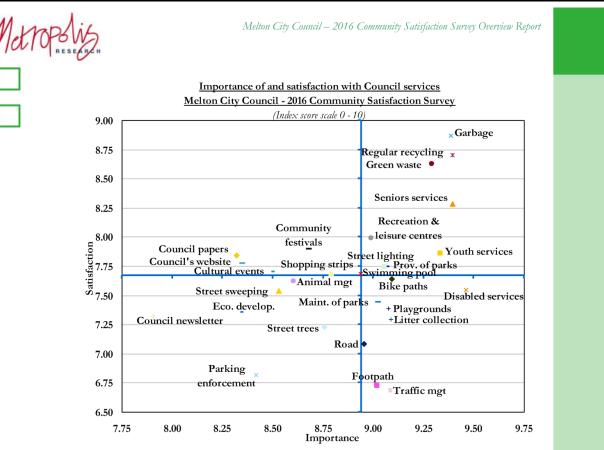

The following graph provides a cross-tabulation of the importance of each of the services and facilities against satisfaction. The cross-hairs represent the average importance (8.94) and the average satisfaction (7.67).

Services in the top, right hand quadrant are those which the respondents rated as more important than average and which are rated at higher than average satisfaction. It is important to note that those services and facilities respondents rated as most important including the waste and recycling services and many of the community services (services for seniors, services for people with a disability) were rated at higher than average satisfaction.

The bottom, right hand quadrant includes those services with a higher than average importance and a lower than average satisfaction. Services of note in this quadrant include traffic management and the maintenance and repair of sealed local roads.

Page 36 of 38

Satisfaction by broad service areas

The thirty-six included Council services and facilities have been broadly categorised into five broad service areas, as outlined in the following graph. These categories have been developed by Metropolis Research in order to provide a consistent set of categories against which to compare satisfaction with Council services and facilities across metropolitan Melbourne.

Satisfaction with these five broad service areas can best be summarised as follows:

- Section 2012 Excellent for each of waste and recycling services and community services
- ⊗ *Very Good* for communication services.

п г

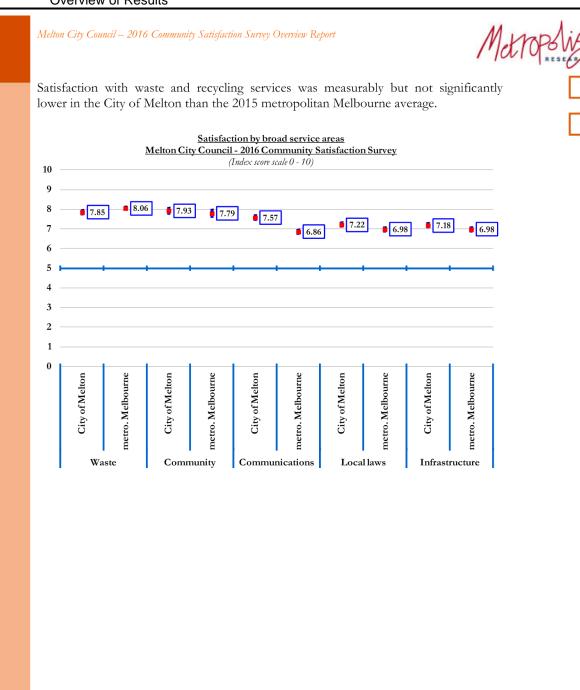

Г

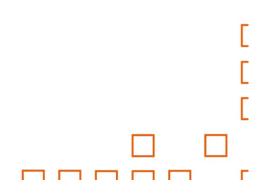

п п

 \otimes **Good** – for local laws and infrastructure services.

It is observed that satisfaction with community services, communications, local laws, and infrastructure services was higher in the City of Melton than the 2015 metropolitan Melbourne averages as recorded in *Governing Melbourne*. Satisfaction with communications services was measurably higher in the City of Melton.
