Structural steel framing works underway

Stormwater system works nearing completion

Removal of rock

Play space drawings finalised

### Welcome...

...to the first edition of the regular progress updates for the Rockbank Murray Road Children's and Community Centre.

These updates are designed to keep the community informed of progress and upcoming changes as a result of the delivery of the new children's and community centre.

This project will support the integrated delivery of early childhood and related family, community and health services to the Thornhill Park area and surrounding community. The centre will service the needs of children, families, young people and seniors including culturally and linguistically diverse members of the rapidly growing population.

Slab prep 15/08/2022

### Works scheduled in September:

- Structural steel framing to roof, plant platforms
- Install timber roof trusses and beams
- Install fascia's/gutters/dp's
