## **MELTON CITY COUNCIL**

MINUTES OF THE SPECIAL MEETING OF THE MELTON CITY  
COUNCIL HELD IN THE COUNCIL CHAMBER, CIVIC CENTRE, 232  
HIGH STREET, MELTON ON 1 SEPTEMBER 2015 AT 5.30PM

**Present:** Cr N Dunn (Deputy Mayor)(Chairperson)  
Cr M Bentley  
Cr R Cugliari  
Cr K Majdlik  
Cr B Turner

Mr K Tori, Chief Executive Officer  
Mr P Bean, General Manager Corporate Services  
Mr D Hogan, Manager Customer Engagement

### **1. APOLOGIES AND LEAVE OF ABSENCE**

Crs Ramsey and Carli.

### **2. DECLARATION OF ANY PECUNIARY INTEREST, OTHER INTEREST OR CONFLICT OF INTEREST OF ANY COUNCILLOR**

Nil.

### 3. PRESENTATION OF STAFF REPORTS

#### 3.1 2015 ELECTORAL REPRESENTATION REVIEW

**Author: Tracy Spiteri- Governance Coordinator**  
**Presenter: Peter Bean- General Manager Corporate Services**

#### PURPOSE OF REPORT

To present for Council consideration a draft preliminary submission to the Victorian Electoral Commission in respect of the 2015 Melton City Council Electoral Representation Review

#### RECOMMENDATION:

That Council adopt and submit the draft 'preliminary' submission to the Victorian Electoral Commission.

#### Motion

Crs Majdlik/Turner.

That Council adopt and submit the draft 'preliminary' submission to the Victorian Electoral Commission with an additional clause included in Councils submission; '*This option also benefits the municipality in a rate capped environment by avoiding adding costs associated with increased Councillor numbers*'.

CARRIED

Cr Majdlik called for a division of Council

#### For:

Crs Cugliari, Dunn, Majdlik and Turner

#### Against:

Cr Bentley

The Chair declared the division CARRIED

---

## REPORT

### 1. Executive Summary

In accordance with Part 10, Division 2 of the *Local Government Act* 1989 (the Act) the Victorian Electoral Commission is to undertake Electoral Representation Reviews.

A notice appeared in the local newspapers advising of the commencement of the Representation Review for Melton City Council inviting preliminary submissions to reach the Victorian Electoral Commission (VEC) by 5.00pm on Wednesday 2 September 2015.

A draft submission has been prepared at **Appendix 2** with Council's preferred option being to retain the current electoral structure of seven (7) Councillors elected from one three-councillor ward and two two-councillor wards with adjustments to the existing ward boundaries to maintain average voter numbers  $\pm$  10% of the average number for each councillor.

## 2. Background/Issues

The *Local Government Act 1989* requires the Victorian Electoral Commission (VEC) to conduct a representation review of each municipality in Victoria before every third council general election which is approximately every 12 years. Representation Reviews are a key mechanism to ensure that all voters within a particular municipality have their concerns and interests fairly and equitably represented. The review aims to ensure the principle of 'one vote one value' applies across a municipality. The Representation Review examines;

- The appropriate number of Councillors
- Whether the structure of the municipality should be subdivided into wards or un subdivided and;
- If subdivided, the number of wards, ward boundaries, the number of Councillors per ward and the possible ward names.

Input from members of the public and other stakeholders is sought by the Victorian Electoral Commission who provide three principal opportunities for involvement, these being;

- A preliminary Public Submission, a response submission to the Preliminary Report, and the opportunity to present at a Public Hearing.
- Key timelines for the City of Melton Electoral Representation Review are/were;

**4 August 2015** – Public Notices appeared in local newspapers

**13 August 2015** – Public Information Sessions, held at Melton Library and Learning Hub and Caroline Springs Library and Civic Centre

**Wednesday 2 September 2015** – Preliminary Submissions close at 5pm

**Wednesday 30 September 2015** – Preliminary Report released by the Victorian Electoral Commission

**Wednesday 28 October 2015** - Public Response Submissions close at 5pm

**Wednesday 4 November 2015** – Public Hearing at Melton Library and Learning Hub 3.30pm

**Wednesday 25 November 2015** – Release of Final Report

A guide for submissions has been produced by the Victorian Electoral Commission which was circulated to all Councillors, see **Appendix 1**.

A briefing/workshop was held with Councillors on 25 August 2015 in relation to the Electoral Representation Review, detailing the impact of growth in the municipality, population estimates and options to consider. Councillors provided staff with direction which enabled the draft submission to be prepared and presented to Council, attached at **Appendix 2**.

A preliminary report will be released by the VEC on 30 September 2015 at which time Council has the opportunity to submit a 'response' submission responding to the recommendations contained in the preliminary report. Should Council wish to be heard at the public hearing on Wednesday, 4 November 2015 to expand on their views, it must nominate to do so in the preliminary report response.

## 3. Council Plan Reference and Policy Reference

The Melton City Council 2013-2017 Council Plan references:

2. A Well Governed and Leading Organisation: Operating with innovation, transparency, accountability and sustainability

*2.6 Ensure timely compliance with statutory and regulatory obligations*

**4. Financial Considerations**

Nil.

**5. Consultation/Public Submissions**

As this process is being conducted by the Victorian Electoral Commission, they are responsible for public consultation.

**6. Risk Analysis**

Nil.

**7. Options**

Council can choose to not make a preliminary submission on the Electoral Representation Review, however officers strongly recommend that Council do make a submission.

**LIST OF APPENDICES**

1. 2015 Melton City Council Electoral Representation Review - Guide for Submissions
2. Submission to the VEC - Electoral Representation Review

## One vote, one value: why the review matters

The Victorian Electoral Commission (VEC) is committed to the principle of 'one vote, one value', which is enshrined in the *Local Government Act 1989* (the Act). This means that every person's vote counts equally. The Act requires the VEC to conduct electoral representation reviews before every third council election, approximately every 12 years. Unscheduled reviews can also take place when required.

Representation reviews are a key mechanism to ensure that all voters in a municipality have their concerns and interests fairly and equitably represented. The electoral representation review will examine:

- the number of councillors
- whether the structure of the municipality should be subdivided into wards or unsubdivided, and
- if subdivided:
  - the number of wards
  - what the ward boundaries should be
  - the name of each ward and
  - how many councillors should be elected for each ward.

Input from members of the public is a valued part of the review process. There are three main opportunities for you to have your say:

1. in a preliminary public submission
2. in a response submission to the preliminary report and
3. if you have requested to speak in your response submission, at a public hearing to be held in your local area.

This guide outlines the review process and the opportunities for public input, and provides important information about the issues that submissions may address. It also includes specific information about Melton City Council and sample submissions to help you prepare your own submission.

## Review timeline

This timeline shows the major milestones in the review process. The opportunities for you to have your say have been highlighted in **bold**.

Wednesday 5 August	<p><b>Preliminary public submissions open</b></p> <p>The VEC accepts <b>written submissions from the public</b> at the start of the review. All submissions are carefully considered and taken into account before the preliminary report is prepared.</p> <p>Advertisements are also placed in the <i>Herald Sun</i> and local newspapers notifying the public of the review.</p>
Thursday 13 August	<p><b>Public information sessions</b></p> <p>A public information session will be held on Thursday 13 August at:</p> <ul style="list-style-type: none"> <li>• 5.00 pm in the Balam Balam Seminar Room, Melton Library and Learning Hub, McKenzie Street, Melton.</li> <li>• 6.30 pm in Meeting Rooms 3 &amp; 4, Caroline Springs Civic Centre Library, 193–201 Caroline Springs Boulevard, Caroline Springs.</li> </ul> <p>Anyone interested in making a submission or with questions about the review process is urged to attend.</p>
Wednesday 2 September	<p><b>Closing date for preliminary submissions</b></p> <p>Preliminary submissions must reach the VEC by 5.00 pm on this date.</p>
Wednesday 30 September	<p><b>Preliminary report released</b></p> <p>The preliminary report outlines the options which provide fair and equitable representation. The report includes consideration of preliminary public submissions. The report is publicly available from the VEC by visiting <a href="http://vec.vic.gov.au">vec.vic.gov.au</a> or calling 131 832 and also for inspection at Council offices.</p> <p><b>Response submissions open</b></p> <p>The VEC accepts <b>written submissions from the public that respond to the recommendations contained in the preliminary report</b>. You can also nominate to discuss your response submission at a local public hearing.</p>
Wednesday 28 October	<p><b>Closing date for response submissions</b></p> <p>Response submissions must reach the VEC by 5.00 pm on this date.</p>
Wednesday 4 November	<p><b>Public hearing</b></p> <p>A public hearing is scheduled to be held at 3.30 pm on Wednesday 4 November in the Balam Balam Seminar Room, Melton Library &amp; Learning Hub, McKenzie Street, Melton.</p> <p>Members of the public who have nominated to discuss their response submission will be given <b>the opportunity to expand on their views</b> for up to 10 minutes. The hearing will not be held if there are no requests to speak.</p>
Wednesday 25 November	<p><b>Final report published</b></p> <p>Following the public hearing, the VEC considers all the evidence it has gathered and publishes a final report for the Minister for Local Government containing a recommended electoral structure. The report is publicly available from the VEC by visiting <a href="http://vec.vic.gov.au">vec.vic.gov.au</a> or calling 131 832, and also for inspection at Council offices. If the VEC's recommendation is accepted, it will take effect at the next general election in October 2016.</p>

## Types of submission

Any person or group, including the Council itself, can make a submission to the VEC.

The VEC accepts submissions at two stages of the review process:

### Stage one: preliminary submissions

Preliminary submissions should address the number of councillors and the electoral structure of Melton City Council. At this stage, the VEC welcomes suggested models that consider the issues outlined in the 'Issues to consider in your submission' section of this guide.

### Stage two: response submissions

Response submissions must address the models proposed by the VEC in the preliminary report. Generally, other models will not be considered at this stage.

Examples of public submissions made in previous reviews can be found in Annex 2 of this guide. However, it is important to note that your submission can be in any format and address any of the relevant issues in the proposed options.

### Public hearing

Response submissions should indicate whether the person making the submission wishes to speak at a public hearing in support of their submission. At this hearing, those who have nominated to discuss their submission will be given 10 minutes to speak. The hearing will not be held if there are no requests to speak.

Guide for Submissions: 2015 Melton City Council Electoral Representation Review

---

## How to make a submission

All submissions, including those sent by post, must be received at the VEC by 5.00 pm on the day of the submission deadline, as detailed in the 'Review timeline' above.

The VEC can only accept submissions that include a full name, address and contact number.

All submissions will be published on the VEC website at [vec.vic.gov.au](http://vec.vic.gov.au) and made available for public inspection at the VEC office (Level 11, 530 Collins Street, Melbourne). The VEC will remove personal information such as address, contact number, and signature, if applicable, from all public copies. However, the full name and locality of submitters will be displayed.

See the 'Submission checklist' on the next page for a quick guide to the possible content of a submission.

### Submission methods

Submissions can be made via:

The online submission form at [vec.vic.gov.au](http://vec.vic.gov.au)

Email at [melton.review@vec.vic.gov.au](mailto:melton.review@vec.vic.gov.au)

Post to  
Victorian Electoral Commission  
Level 11, 530 Collins Street  
Melbourne VIC 3000

Fax to (03) 9629 8632

## Guide for Submissions: 2015 Melton City Council Electoral Representation Review

**Submission checklist**

This checklist provides you with an idea of the range of issues you might consider in your submission. See the 'Issues to consider on your submission' section on the next page for an explanation of these steps.

*Before you send your submission:*

✓

Have you included your full name, address and a contact number?	
Do you understand that your submission will be made public, including your full name and locality?	

*If you are making a submission about the **number of councillors** (see page 9)*

Does your submission suggest a number of councillors between 5 and 12?	
If the number of councillors you have suggested varies substantially from numbers in similar municipalities, have you explained why?	

*If you are making a submission about the **electoral structure** (see page 11)*

Have you indicated whether you want the municipality to be subdivided or unsubdivided?	
Have you explained why your preferred structure would best suit the municipality?	

*If you think that the municipality should be **subdivided into wards** (see page 12)*

Have you indicated whether you want single-councillor wards, multi-councillor wards or a combination of both?	
Have you indicated where the ward boundaries should be located and provided reasons for these proposed boundaries?	
Have you considered the number of voters in the proposed wards?	
If you have suggested ward names, have you given reasons for those names?	

*If you are making a **response submission** to the preliminary report*

Does your submission address the options recommended in the preliminary report?	
Have you indicated whether or not you would like to speak about your submission at the public hearing?	

## Issues to consider in your submission

Your submission may address one or both of the following issues:

- the number of councillors (between 5 and 12), and
- the structure of the electorate (subdivided or unsubdivided).

You may make a submission in support of the current structure in the municipality, or in support of a different electoral structure and/or number of councillors. It is important that your submission provides reasons for your preferences.

This section provides an overview of issues for you to consider before making your submission.

### Number of councillors

When making a submission about the number of councillors, there are three important guidelines that the VEC follows that you need to bear in mind. These are that:

**1. The number of councillors is between 5 and 12.**

The Act allows for a municipality to have between 5 and 12 councillors. As the number of voters in each municipality varies significantly, and as populations change over time, the VEC applies the requirements for fairness and equity in a logical way—those municipalities that have a larger number of voters generally have a higher number of councillors.

**2. The number of voters represented by each councillor is fair and equitable across the municipality.**

If the municipality is divided into wards, the number of voters represented by each councillor must be within 10% of the average number of voters per councillor across the municipality. This is called the 'legislative equality requirement', which ensures the principle of 'one vote, one value'.

*EXAMPLE 1:* A subdivided municipality has 100,000 people eligible to vote and a total of 10 councillors. The ward boundaries for this municipality should be structured to ensure that each councillor represents the equivalent number of voters, approximately 10,000 (plus or minus 10%).

Guide for Submissions: 2015 Melton City Council Electoral Representation Review

---

*EXAMPLE 2:* A municipality is subdivided into two wards, with 21,000 people eligible to vote and a total of seven councillors. Ward A has a voting population of 12,000 and Ward B has a voting population of 9,000. On this basis, Ward A should have four councillors, and Ward B should have three councillors. Each councillor then represents the equivalent number of voters (3,000).

The VEC also takes into account likely population changes to ensure ward boundaries provide equitable representation until the next review is conducted (reviews take place approximately every 12 years). Population and development forecasts for the municipality are provided in the 'Melton City Council at a glance' section of this guide.

**3. A consistent, State-wide approach is taken to the total number of councillors.**

When reviewing a council, the VEC is guided by its comparisons with municipalities of a similar size and category (metropolitan; metropolitan-rural fringe; regional urban; and rural). Please see the tables in Annex 1 for relevant data on the City of Melton and similar municipalities.

The VEC also considers any special circumstances that may warrant the municipality having more or fewer councillors than similar municipalities. These might include:

- significant population growth within the municipality
- an especially mobile or transient population
- cultural and linguistic diversity within the community
- socio-economic disparities
- a large proportion of older residents who may have special interests and needs
- the number of non-residents and company nominees
- a wide geographic distribution of voters within a large municipality
- a large number of communities of interest (see 'Communities of interest' section).

Guide for Submissions: 2015 Melton City Council Electoral Representation Review

**Structure of the municipality**

Your submission may also address the structure of Melton City Council, which can be:

- **unsubdivided**, with all councillors elected 'at large' by all of the voters in the municipality, or
- **subdivided into wards**, with one or more councillors elected by the voters in each ward.

If the municipality is subdivided, your submission may also address:

- the number of wards
- what the ward boundaries should be
- the name of each ward and
- how many councillors should be elected for each ward.

This section provides information about these different electoral structures.

**Unsubdivided councils**

**More positive features**

Promotes the concept of a municipality-wide focus with councillors being elected by, and concerned for, the municipality as a whole, rather than parochial interests.

Gives residents and ratepayers a choice of councillors to approach with their concerns.

Each voter has the opportunity to express a preference for every candidate for the Council election.

Removes the need to define internal ward boundaries.

If a councillor resigns or is unable to complete their term, a replacement councillor is elected through a countback system, negating the need for a by-election.

**Less positive features**

May lead to significant communities of interest and points of view being unrepresented.

May lead to confusion of responsibilities and duplication of effort on the part of councillors.

Large numbers of candidates might be confusing for voters.

May lead to councillors being relatively inaccessible for residents in parts of the municipality.

May be difficult for voters to assess the performance of individual councillors.

If only a few candidates contest the general election, the countback system may elect a candidate who only polled a small percentage of the vote.

Guide for Submissions: 2015 Melton City Council Electoral Representation Review

**Subdivided councils**

There are three ways to divide a council into wards:

- single-councillor wards with just one councillor representing the ward
- multi-councillor wards with several councillors
- combinations of the two.

**Single-councillor wards**

**More positive features**

Councillors are more likely to be truly local representatives, easily accessible to residents and aware of local issues.

Major geographical communities of interest are likely to be represented.

**Less positive features**

Councillors may be elected on minor or parochial issues and lack a municipality-wide perspective.

Ward boundaries may divide communities of interest and may be difficult to define.

Voters may have a restricted choice of candidates in elections for individual wards.

Small populations in each ward may make ward boundaries more susceptible to change as a result of population growth or decline.

Where major groups support candidates in multiple wards, it is possible that one group can dominate the council.

**Multi-councillor wards**

**More positive features**

Can accommodate a large community of interest.

Focus on issues may be broader than in single councillor wards (though councillors may have a more local focus than in an unsubdivided municipality).

Councillors may be more accessible than in an unsubdivided municipality. Electors have a choice of councillors.

Councillors may share workloads more effectively.

Ward boundaries should be easy to identify and less susceptible to change as a result of population growth or decline than in single councillor wards.

**Less positive features**

Groups may form within the council leading to possible division between councillors.

Very specific local issues may not be addressed.

In very large wards, councillors may not be accessible for residents in parts of the ward.

Duplication may occur if councillors do not communicate or share their workloads.

## Guide for Submissions: 2015 Melton City Council Electoral Representation Review

***A combination of multi-councillor and single-councillor wards*****More positive features**

A large community of interest can be included within a multi-councillor ward and a smaller community of interest can be included within a single-councillor ward. This structure accommodates differences in population across a municipality, and allows small communities to be separately represented.

Clear ward boundaries are more likely.

**Less positive features**

Electors in single-councillor wards may expect their councillors will be more influential than their numbers suggest.

Different vote counting systems within the same municipality may seem inconsistent.

**Electoral structures and vote counting**

According to law, the structure of the council determines the vote counting system. You may wish to consider the impact of these counting systems in making your submission.

In single-councillor wards, the preferential system applies, which means a candidate must achieve an absolute majority (50% plus one) of the formal votes to be elected, otherwise the outcome will be determined based on preferences.

In multi-councillor wards or in unsubdivided municipalities, proportional representation applies, and candidates are elected in proportion to their support within the electorate. The required quota of votes is reached by dividing the total number of formal votes by the number of vacancies plus one. Therefore, unlike the preferential vote counting system where only the candidate with the majority of votes is elected, other candidates representing groups or issues that have significant minority support may also be elected.

*EXAMPLE:* An unsubdivided municipality has seven councillor positions and therefore uses proportional representation. In this municipality, any candidate achieving greater than 12.5% of the vote will be elected.

Visit the VEC website at [vec.vic.gov.au/Elections/CountingTheVotes.html](http://vec.vic.gov.au/Elections/CountingTheVotes.html) for more detailed information on the preferential and proportional counting systems.

Guide for Submissions: 2015 Melton City Council Electoral Representation Review

**Communities of interest**

Communities of interest are groups of people who share a range of common concerns or aspirations. They are different from ‘interest groups’ or ‘pressure groups’ that identify themselves based on a limited number of issues.

Communities of interest may occur where people are linked with each other geographically (e.g. a town or valley) or economically (e.g. people working in similar industries or mutually-dependent industries). Communities of interest may also appear where people share a number of special needs because of similar circumstances, such as new immigrants (who may not have strong English language skills, and require assistance with housing and finding employment); particular ethnic groups; retirees; or job seekers.

Communities of interest are an important consideration in electoral representation reviews as they have particular needs from their local council. In such cases, it is important the communities of interest have the opportunity to be fairly represented by their council. There are a number of ways to take account of communities of interest, depending on how they are distributed geographically.

<b>If a community of interest...</b>	<b>Then fair representation may be achieved by:</b>
is in the same geographic area (e.g. a town)	creating a ward with boundaries reflecting that community of interest.
is widespread across the municipality (e.g. job seekers)	creating multi-councillor wards with proportional representation.
is one of a number of small communities of interest	combining the communities of interest via an unsubdivided structure, so that any elected councillor would be responsible to all of these groups.

**Ward boundaries**

Ward boundaries must ensure that the statutory equality requirement is met—the number of voters represented by each councillor must be plus or minus 10% of the average number of voters per councillor across the municipality.

Because representation reviews are scheduled approximately every 12 years, population growth areas often need to be spread across a number of wards to ensure that the voter-councillor ratios remain acceptable during this time. Fewer wards mean a larger average number of voters per ward and a greater tolerance to population changes.

Boundaries should always take into account communities of interest and should follow clear lines (major roads, rivers, significant landmarks and existing locality boundaries where possible).

Guide for Submissions: 2015 Melton City Council Electoral Representation Review

---

**Ward names**

The VEC welcomes suggestions for ward names. The names must be relevant and specific to the ward to avoid any possible confusion with other wards. Some popular approaches include using:

- place names
- compass directions
- historic buildings
- natural features present in the ward
- names of pioneers and former prominent citizens
- Aboriginal names
- native flora or fauna.

## How recommendations are formed

The VEC is an impartial statutory authority and conducts the reviews independently of councils and the State Government.

Public submissions are an important part of the review process, but there are several other important considerations. The recommendation is not based on a 'straw poll' of the number of submissions supporting a particular option, but holistically takes into account:

- internal research specifically relating to the municipality under review
- the VEC's experience conducting previous electoral representation reviews of local councils and similar reviews for State elections
- the VEC's expertise in mapping, demography and local government
- careful consideration of all input from the public in written and verbal submissions received during the review and
- advice from consultants with extensive experience in local government.

### Limitations of the review

It is important to note that an electoral representation review cannot deal with the external boundaries of a municipality or decide whether a municipality should be divided or amalgamated with other municipalities.

In addition, a review cannot consider the vote counting system used in local council elections. The counting system is determined by the structure of the municipality—in single-councillor wards, the preferential system applies, and in multi-councillor wards or in unsubdivided municipalities, proportional representation applies. See the 'Electoral structures and vote counting' section above.

Guide for Submissions: 2015 Melton City Council Electoral Representation Review

---

## Summary of 2008 review of Melton City Council

The last electoral representation review for Melton City Council<sup>1</sup> took place in 2007–08.

Following the review, the VEC recommended that the electoral structure of the municipality change from seven single-councillor wards to seven councillors elected from one three-councillor ward and two two-councillor wards. Public submissions contained diverse opinions regarding an appropriate electoral structure for the municipality.

The VEC considered seven councillors was appropriate for the municipality, with the voter-to-councillor ratio remaining viable. The VEC also recommended moving from single-councillor to multi-councillor wards, with the view that a three ward structure would better represent the three geographic communities of interest in the municipality (the Melton area in the west of the municipality, the urban east and the rural balance), while providing greater longevity of the electoral structure by managing population growth.

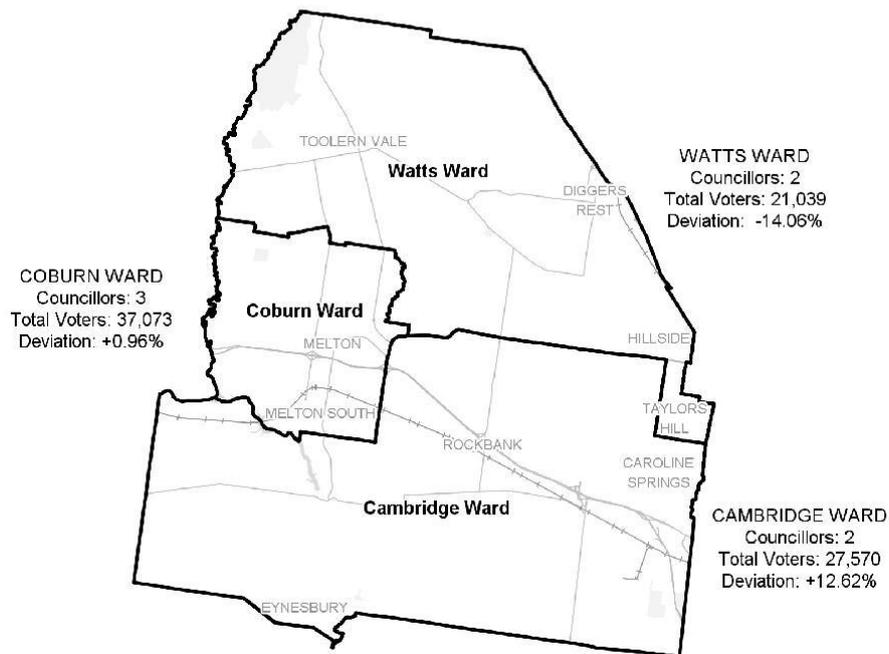

---

<sup>1</sup> The municipality was previously named 'Melton Shire Council'. It was restyled 'Melton City Council' by an Order in Council on 6 September 2012.

Guide for Submissions: 2015 Melton City Council Electoral Representation Review

**Map: current boundaries and voter numbers**

The map below details the current boundaries and voter numbers as at 6 May 2015. Visit the VEC website at [vec.vic.gov.au/reviews/meltonrr.html](http://vec.vic.gov.au/reviews/meltonrr.html) to access more detailed maps and a copy of the 2008 review final report.

## Melton City Council at a glance

The City of Melton is approximately 40 kilometres from the centre of Melbourne and covers 528 square kilometres. It is located on the western fringe of Melbourne and adjoins the fast growing municipalities of Brimbank, Hume and Wyndham. The population is generally dispersed across three areas in the municipality, with the largest population area situated along the eastern boundary of the municipality, including the suburbs of Caroline Springs (which takes in a master-planned residential community), Taylors Hill, Burnside Heights and part of Burnside. This area is generally considered part of the outer fringe of Melbourne.

The second largest population area is in the west of the municipality, and includes the suburbs of Melton, Melton West, Melton South and Kurunjang. It is separated from the fast growing eastern area by the rural and semi-rural areas of Rockbank and Mount Cottrell, which are comprised of low density, rural and semi-rural properties.

### Current population estimates in major suburbs<sup>2</sup>

Caroline Springs	20,366
Melton	7,593
Melton West	14,171
Melton South	8,916
Kurunjang	9,228
Taylors Hill	11,785
Burnside Heights	5,000
Diggers Rest	2,275
Hillside	16,326
Brookfield	6,104

The City of Melton is one of the fastest growing municipalities in Victoria; the population grew by 4% between 2013 and 2014 (4,860 people). This reflects the overall forecast trend of significant population growth for the municipality, with approximately 254,000 people expected to reside in the City of Melton by 2031, representing a 4.3% average annual growth rate.<sup>3</sup>

Demographically, the City of Melton has a younger population compared to the Greater Melbourne average, with those under 18 years of age comprising 28.8% of the population. The percentage of people aged 50 years or over at 21.5% is significantly lower than the Greater Melbourne average of 30.3%.

<sup>2</sup> Australian Bureau of Statistics (ABS) 2011 Census: State Suburbs.

<sup>3</sup> Department of Transport, Planning and Local Infrastructure, *Victoria in Future 2014*, 2014.

## Guide for Submissions: 2015 Melton City Council Electoral Representation Review

Social diversity is comparable to the Greater Melbourne average, with 26.4% of people speaking a language other than English at home and 29.3% of people born overseas—predominantly from the United Kingdom (3.4%), India (2.8%), Philippines (2.8%), New Zealand (2%) and Malta (1.9%).

The 2011 Census data also indicates that 0.75% of the population of Melton identify as Aboriginal and/or Torres Strait Islander, which is slightly higher than the Greater Melbourne average. The municipality is traditionally part of the Kulin Nation, a confederacy of five indigenous language groups covering municipalities in the western region of Greater Melbourne.<sup>4</sup>

Overall, the majority of employing industries are labour based. Major industries in the City of Melton include manufacturing (18%), construction (16.8%) and transport, postal and warehousing (14.2%), all of which employ a significantly higher percentage of the workforce compared to the Greater Melbourne average. Professional, technical and scientific services employ 4.5% of the population, half the Greater Melbourne average.

According to the 2011 Census, the workforce participation rate in the City of Melton was 69.2% and the unemployment rate was 4.2%. However, the unemployment rate across the municipality is not uniform, with pockets in the areas of Melton, Melton South, Melton West, Rockbank and Burnside having unemployment rates around 14%. Correspondingly, there were fewer high income earners (3% earning more than \$1,500 per week) than the Greater Melbourne average, and a comparable number of low income earners (37.8% earning less than \$399 per week).

Resident mobility in the municipality is quite high, with 50% of the population indicating they had moved residences in the five years between 2006 and 2011. In the suburbs of Exford, outer Melton West, Burnside Heights and Taylors Hill, 65 to 87% of the population had moved residence in a five year period.

^ Councillors other than the Lord Mayor and Deputy Lord Mayor.

† Councillors other than the Mayor.

## Annex 2: Sample submissions

Any person or group can make a submission to the VEC. There are many matters to be considered when determining the electoral structure of a municipality and you might like to take all issues into account or just focus on one issue you wish to bring to the attention of the review.

The sample submissions below should be considered as examples only to assist you in preparing your own submission. Submissions discussing or proposing ward boundaries can include maps or diagrams, but this is not required. Remember, there are no right or wrong ways to develop your submissions—just be sure your submission is limited to the scope of the review and includes reasons for your preferences.

### Stage one: preliminary submission samples

#### **Sample 1**

The current number of councillors is appropriate for the council under review, and is sufficient to provide fair and equitable representation for locals. The number of councillors is consistent with comparable regional municipalities, and there are no major forecasts in population growth or increased communities of interest that would justify more councillors.

In terms of electoral structure, I strongly support the continuation of the unsubdivided structure. In 2004, before the Council was unsubdivided, there were seven single-member wards. One of the key issues with this structure was a tendency toward there not being a whole-of-Shire development agenda. Having five councillors who look after the needs of the entire Shire has greatly improved strategic planning and development for all areas of the Shire.

#### **Sample 2**

The council currently has five councillors, which is not enough to serve the current population—increasing to seven councillors would be more representative. Similarly, an electoral structure that includes multi-wards or is unsubdivided would allow for greater representation for the public. The current structure comprises five single-councillor wards. My experience has been that when a councillor is overworked or not interested in an issue, going to a councillor outside the ward is the only option.

There are also a significant number of communities of interest that exist across the council area, including residents engaged in environmental issues, planning and development and public transport access. A proposed ward structure is included with my submission.

## Guide for Submissions: 2015 Melton City Council Electoral Representation Review

**Stage two: response submission samples****Sample 1**

I support the preferred option outlined in the preliminary report that recommends increasing the number of councillors from seven to nine, and changes the electoral structure to include three wards, each with three councillors. This electoral structure reflects the growing population of the council area, and the three wards will ensure that all voters are fairly represented in the electorate. I don't wish to propose ward name changes. I don't wish to speak at the public hearing.

**Sample 2**

I do not agree with the preferred option outlined in the preliminary report, which recommends creating two two-councillor wards and one three-councillor ward—rather than the current seven single-councillor wards. I believe this does not accurately reflect the communities of interest in the council area, which are determined largely by location. Each ward represents a unique part of the council area and voters know which councillor to go to. I believe this would be lost under the proposed structure. I would like to speak at the public hearing in support of my submission.

Melbourne VIC 3000

2 September 2015

Submission by email to: [melton.review@vec.vic.gov.au](mailto:melton.review@vec.vic.gov.au)

Dear Electoral Commissioner

This submission is made on behalf of the Councillors of the Melton City Council in relation to the 2015 Electoral Representation Review of the City of Melton.

Council acknowledges that 'representation reviews are a key mechanism to ensure that all voters in a municipality have their concerns and interest fairly and equitably represented'.

Accordingly, Melton City Council respond and submit as follows:

**1. Number of Councillors.**

**Option 1 (preferred)** – The existing structure of seven (7) councillors elected from one three-councillor ward and two two-councillor wards be maintained as the most appropriate electoral structure for the community with a current voter ratio of 1:12,100.

Council believe that they have the capacity to fully service the needs of current and future populations within the municipality with seven (7) councillors, whilst continuing to provide high levels of engagement and representation.

**Option 2 (least preferred)** – The number of councillors be increased from seven (7) councillors to nine (9) councillors elected from one four-councillor ward, one three-councillor ward and one two-councillor ward with a 2015 voter ratio of approximately 1:9,500.

In comparison with like Councils (voter per councillor ratio) and taking into consideration Councillor workloads and the geographic areas of representation, Melton City Council consider that **option 1** with seven (7) councillors is still appropriate and is the preferred option, maintaining consistency with the current electoral structure.

**2. Structure of the municipality**

To support **option 1** electoral structure it is recommended that the current ward boundaries be realigned to maintain average voter numbers  $\pm 10\%$  of the average number. Council recommends the following ward structure areas:

- **Coburn Ward (3 councillors)** – inclusive of Melton West, Brookfield, Parwan, Exford, Eynesbury, Kurunjang, Melton South and part Mount Cottrell, Melton and Toolern Vale.
- **Cambridge Ward (2 councillors)** – inclusive of Rockbank, Burnside, Burnside Heights, Ravenhall, Truganina, and part Plumpton, Caroline Springs, Mount Cottrell and Rockbank.
- **Watts Ward (2 councillors)** – inclusive of Diggers Rest, Hillside, Taylors Hill and part Melton, Plumpton, Rockbank and Caroline Springs.

To support **option 2** electoral structure it is recommended that the current ward boundaries be realigned to maintain average voter numbers  $\pm 10\%$  of the average number. Council recommends the following ward structure areas:

- **Coburn Ward (4 councillors)** – inclusive of Melton West, Brookfield, Parwan, Exford, Eynesbury, Kurunjang, Melton South and part Mount Cottrell, Melton and Toolern Vale.
- **Cambridge Ward (3 councillors)** – inclusive of Rockbank, Burnside, Burnside Heights, Ravenhall, Truganina and part Plumpton, Caroline Springs, Mount Cottrell, and Rockbank.
- **Watts Ward (2 councillors)** – inclusive of Diggers Rest, Hillside, Taylors Hill and part Melton, Plumpton, Rockbank and Caroline Springs.

In support of Council's position on the number of councillors and the structure of the municipality, the following should be noted:

- The current electoral model, with adjusted ward boundaries to support fair and equitable voter representation, has successfully and effectively represented the community since the 2008 review.
- Melton City Council is operationally and logistically set up to accommodate and support a seven councillor structure. **Option 1** (preferred) will enable Council to continue to be immediately effective and can be supported within the existing annual budget. Any increase to the number of councillors (**option 2**) will require additional resources and budget investment.
- Melton City Council's population is forecast to grow to 216,395<sup>1</sup> (voter population of 143,291) over the next twelve years. The major growth areas in the municipality are represented in all three wards which will support a more sustainable electoral model and maintain distribution of voter population within the  $\pm 10\%$  criteria.
- A three-ward electoral model supports the concept that fewer wards mean a larger average of voters per ward and a greater tolerance to population changes.
- The current ward names of Coburn, Watts and Cambridge are considered appropriate for the preferred ward structure proposal.

#### Communities of Interest

- **Distinct population centres.** The three-ward structure generally recognises the municipality's major geographic communities of interest that currently exist within the municipality; the Melton township area to the west, the urban extension of greater metropolitan Melbourne in the east, and emerging urban growth corridor between the two existing communities.
- **New/emerging residential areas.** The City of Melton has a significant number of growth areas, many of which are still to emerge. These areas are considered a distinct community of interest for representation in terms of new infrastructure and community facilities for young families. Over time, these will be equally represented in all three wards.
- **Established Residential areas.** The major established township west of the municipality is semi-rural in character and history, fully developed with in-fill development pressures and renewal of assets and infrastructure a priority.
- **Rural areas/small townships.** In addition to the major growth areas within the urban growth corridor, smaller townships on the fringe of the municipality continue to experience growth and challenges with the blending of existing residential areas with new/emerging ones.

---

<sup>1</sup> Population and household forecasts, 2011 to 2036, prepared by .id, the populations experts, December 2014.

**Special circumstances**

Council has given due regard to the following factors in its deliberation of its preferred electoral structure (**option 1**).

- **Significant population growth.** The City of Melton is the fourth<sup>2</sup> fastest growing municipality in Victoria with the distribution of population growth set to increase significantly in the urban growth area (between the Melton township and Eastern metropolitan area). Smaller townships such as Eynesbury, Rockbank and Diggers Rest are also forecast to more than treble in population over the next 12 years.
- **Areas of relative disadvantage.** The City of Melton was ranked 31 in the 2011 Social and Economic Index for Areas (SEIFA) with a index of 1002.1. There are distinct pockets of disadvantage within the municipality including Melton, Melton South, Melton West, Kurunjang and the smaller outer hamlet of Diggers Rest. Council's preferred recommendation (**option 1**) predominantly encapsulates this community of interest within a single ward.
- **Fire risk rural/residential areas.** Toolern Vale and parts of Diggers Rest along the northern rural area of the municipality, and Eynesbury along the southern boundary of the municipality are subject to bushfire and grassfire threats during fire danger periods.
- **Significant areas of first home buyers.** The City of Melton is experiencing significant growth and with house and land affordability, attracts greater number of young families and first home buyers. The community needs of first home buyers and families for infrastructure, community facilities and support services are generally greater in these areas.
- **11 new suburb areas.** Melton City Council has recently undertaken a significant suburb naming project and are awaiting the approval and gazettal by the Office of Geographic Place Names<sup>3</sup> of 11 new suburb areas within the municipality, refer Appendix 1 and 2.

In summary, the current three ward structure introduced after the 2008 review is considered the most appropriate option to meet the fair and equitable representation of the City of Melton residents, based on communities of interest, Councillor workloads and special consideration of the communities within.

Melton City Council look forward to receiving the VEC Preliminary Review report on 30 September 2015.

Yours sincerely

Kelvin Tori  
Chief Executive Officer

## MINUTES OF THE ORDINARY MEETING OF COUNCIL

21 OCTOBER 2014

**11.15 SUBURB NAMING PROJECT**

**Author: Daniel Hogan- Manager Customer Engagement**  
**Presenter: Peter Bean- General Manager Corporate Services**

Cr Dunn having declared a conflict of interest in this matter in item 5 in the agenda removed herself from the chamber prior to any discussion taking place.

**PURPOSE OF REPORT**

To inform Council of community and Advisory Committee feedback in relation to the establishment of eleven new suburbs within the municipality, and to seek Council's final determination of the proposed boundaries and names of each respective suburb for submission to the Office of Geographic Names.

**RECOMMENDATION:**

That Council;

- 1) note and accept the recommendations contained within the unconfirmed minutes of the Suburb Naming Advisory Committee Meeting of Wednesday 1 October, 2014 (**Appendix 1**), with particular reference to boundary establishment and recommended suburb names;

Suburb 1	Harkness
Suburb 2	Weir Views
Suburb 3	Cobblebank
Suburb 4	Strathulloh
Suburb 5	Thornhill Park
Suburb 6	Grangefields
Suburb 7	Bonnie Brook
Suburb 8	Aintree
Suburb 9	Fieldstone
Suburb 10	Fraser Rise
Suburb 11	Deanside

- 2) direct Council Officers to take all necessary steps to apply to the Office of Geographic Names, Department of Transport, Planning & Local Infrastructure, for the establishment of the additional suburbs as defined.

Cr Ramsey/Carli. That the recommendation be adopted.

CARRIED

Cr Turner called for a division of Council.

**For:**

Cr Carli, Cugliari, Majdik, Matalowski, Ramsey and Turner.

**Against:**

Nil.

The Mayor declared the division CARRIED

## MINUTES OF THE ORDINARY MEETING OF COUNCIL

21 OCTOBER 2014

## REPORT

1. **Executive Summary**

Exceptional ongoing urban growth in the City of Melton has created a need for several new suburbs.

At the Ordinary Meeting of Council held on 20 September 2012, Council directed that Officers begin the process of establishing 11 new suburbs within the municipality, as informed by boundaries recommended by the Property Development Advisory Committee (PDAC) in July 2012.

Council further directed that the process be accompanied by an extensive community engagement strategy to develop naming proposals and receive alternative boundary alignments.

At the Ordinary Council Meeting of 5 March 2013, Council established the Suburb Naming Advisory Committee, featuring significant community and key stakeholder representation, in order to develop a naming shortlist in alignment with Office of Geographic Names (OGN) Guidelines for Geographic Naming.

An extensive community engagement campaign promoting naming options and proposed boundaries was conducted from early August 2014 through to September 2014, encouraging the community to vote for their preferred suburb names. Across a variety of mediums, 16,000 votes were cast.

On 1 October 2014, the Suburb Naming Advisory Committee considered all community and stakeholder feedback, and made a series of recommendations for Council's consideration as contained within the unconfirmed minutes, attached as **Appendix 1**.

Council is now required to make a final determination of boundaries and names for each of 11 new suburbs for submission to the OGN, operating under the Department of Transport, Planning & Local Infrastructure, for approval and establishment.

2. **Background/Issues**

The Guidelines for Geographic Names 2010 (**Appendix 2**) state that, "Municipal Councils play an important role in ensuring that localities in all areas of Victoria are properly defined and named. With increases in the Victorian population there are new residential and business areas being developed on a regular basis. Councils should ensure that they regularly review their locality boundaries and assess whether they adequately define the existing situation. If major developments considered to be unique to an area are proposed, for example a set of subdivisions readily distinguishable from the surrounding landscape, municipal councils should consider creating a new locality. The benefits of creating a new locality relate to allowing the area's residents and businesses to use a unique name for addressing purposes."

It is clear that these conditions for action currently exist in Melton City, which will continue to experience significant growth over the next 20 years. Several established or planned Precinct Structure Plans (PSPs) will see significant residential development with Principal Activity Centre's (PACs) and Major Activity Centre's (MACs) to the north and south of Melton township, the Rockbank and Plumpton areas.

Process

Councils are permitted as a naming authority to submit an application for the formation of new localities (suburbs) to the Department of Transport, Planning & Local Infrastructure under s.5 of the Geographic Place Names Act 1998. Council must follow the formally established Guidelines for Geographic Naming (**Appendix 2**) as set down by the Office of Geographic Names (OGN).

## MINUTES OF THE ORDINARY MEETING OF COUNCIL

21 OCTOBER 2014

The formal proposal process is set out in great detail in the guidelines, and the key principles for consideration, inclusion or exclusion of any suburb names are; Language, Public interest, Public safety, Duplication, Directional naming, Assignment, Linking name to place, Commemoration, Commercial interests, Discrimination, and Indigenous recognition.

Particularly important in the process is the appropriate engagement of the local community and key stakeholders to alert them of the proposal, allow time to receive objections, and to inform the eventual boundaries and naming of the newly established suburbs.

Boundary development

In establishing suburban boundaries, the following factors were taken into account;

- Neighbourhood character should be a defining element for any new locality;
- Suburbs should be based on an ultimate population of between 10,000 – 20,000;
- Existing suburbs localities and names should predominantly be retained;
- Logical and obvious boundaries should be adopted where possible;
- Each suburb should have an activity centre of some description, either planned or delivered and at Neighbourhood, Major or Principal level which may include a train station;
- Consideration will be given to existing communities of interest, historic naming, localities and heritage issues;
- Existing suburb boundaries that remain untouched will retain their current name.

Guided by those critical success factors, large scale map overlays of existing suburb boundaries, significant topographical features, cadastral fabric, planned and established Precinct Structure Plans (PSPs) and the Melbourne West Growth corridor were the primary tools used to establish the proposed suburb boundaries.

Given the passage of time between the first draft boundaries drawn and current day, changes to long term strategic planning and PSP layouts have made necessary the redrawing of two boundaries. The boundaries as recommended by the advisory Committee are considered up-to-date with the latest planning proposals and respond to stakeholder submissions identifying the same boundary issues during the consultation phase.

Suburb Naming

The Suburb Naming Advisory Committee was formed with the express intention to assist in the development of a naming shortlist for Council consideration for wider distribution and community feedback. Membership included;

Wurundjeri Council x 1

Wathaurong Aboriginal Corporation x 1

Urban Development Institute of Australia x 1

Greater Melton Chamber of Commerce Inc. x 1

Melton Historical Society x 1

Melton Family History Group x 1

Community Members x 2

Melton City Councillors x 4

Melton City Council Officers

Committee members, applying their expertise and canvassing members and constituents, developed a list of 172 names for deliberation. Names were debated and 35 shortlisted for the consideration of the public through the community engagement campaign. (**Appendix 3**)

---

MINUTES OF THE ORDINARY MEETING OF COUNCIL21 OCTOBER 2014

---

Community Engagement

Considered by the guidelines as an essential requirement, a significant community engagement campaign was conceived (**Appendix 4**). This included the development of a purpose-built website, town-hall meetings, direct mail voting forms, social media, print advertising, letter writing, outdoor advertising and more.

Calling for the community to vote for their preferred suburb names, provide original submissions and to consider the impacts of boundary changes, a total of 16,000 votes were received by Council (**Appendix 4**). These votes were tallied and considered by the Committee, pursuant recommendations as attached within **Appendix 1**.

Further information will be sent to those residents and ratepayers affected by the proposal, informing them of any submission to the OGN, and of any eventual change should the proposal be accepted by the State. Additionally, more than 1,000 residents have requested to be kept informed of the process.

Submission

Once a submission is made to the OGN, "the Registrar will check that the new name and boundaries conform to all the principles of the guidelines, in particular that the name is not duplicated and that the creation of the new locality can be considered to be in the long-term interests of the community. If the Registrar deems that the proposal conforms to the guidelines, the Registrar will proceed to gazette the proposal."

"If the Registrar deems that the proposal does not conform to these guidelines, the proposal will be returned to the naming authority with either a request for further information or advice that the proposal be redesigned so that it might be acceptable for future consideration and registration."

"Once a name has been approved by the Registrar for registration, a notice will be published in the Victoria Government Gazette notifying registration of the name. The gazette notice acts as an official notification that the proposal will be registered in VICNAMES. The gazette date will be recorded as the official date of registration."

**3. Council Plan Reference and Policy Reference**

The Melton City Council 2013-2017 Council Plan references:

1. Managing our Growth: A clear vision to connect and develop a sustainable City
  - 1.1 Strategically plan for a well designed and built City

**4. Financial Considerations**

There is no requirement for further financial investment from Council in order to pursue an application to the OGN for the establishment of additional suburbs.

**5. Consultation/Public Submissions**

Extensive public consultation is necessary under the Guidelines. Council conducted a wide ranging community engagement campaign (**Appendix 4**) to ensure that all residents and ratepayers were informed of Council's intentions and encouraged to participate in the selection of suburb names. Submissions were also encouraged to inform the establishment of suburban boundaries. More than 16,000 votes were received through a range of feedback options.

## MINUTES OF THE ORDINARY MEETING OF COUNCIL

21 OCTOBER 2014

---

**6. Risk Analysis**

Should Council accept the recommendations as put, no significant risks apply, notwithstanding the fact that the subjective nature of suburb naming will result in some objections being received. Formal objections will be sought and received by the OGN, not Council.

Should Council reject the recommendations as put, and seek to establish alternative suburb names, again, no significant risks apply outside complaints received as a consequence of individual naming preferences and subjective judgements which are unavoidable. Council is well within its statutory and moral rights to elect alternative suburb names for submission, as the Committee was formed with the express terms of reference to be advisory in capacity only, and its recommendations should only be considered as such.

However, selecting a significant number of names that have not previously been considered by the Committee or been publically canvassed does carry the risk that the OGN may reject the application, as it may be considered that a public engagement process has not occurred. In this instance, Council would be required to repeat the significant effort to seek community feedback of the new names.

Establishing alternative boundaries also carries more significant risk, as the proposed boundaries are established upon a range of strategic documents and planning at a local, state and federal level. Changes to this may result in damaging, if unintended, consequences.

**7. Options**

Council may choose;

- 1) to reject the premise of the report and not pursue the establishment of additional suburbs to maintain current geographical arrangements,
- 2) accept the boundary and suburb naming recommendations of the advisory Committee in full for application to the OGN, or
- 3) note the recommendations of the advisory Committee in relation to either or both suburb boundaries or names, and determine alternatives for application to the OGN.

**LIST OF APPENDICES**

1. Suburb Naming Advisory Committee Minutes 1 October 2014
2. Office of Geographic Names Guidelines
3. Suburb Naming Advisory Committee Border and Naming Recommendations
4. Suburb Naming Project Community Engagement Campaign

		just a hand full.
8	Chamois Ponds	1st Homestead of the Pinkerton Family on the Kororoit Creek Sinclair Road Area. James Pinkerton arrived in Port Phillip in 1839. He held a grazing licence in the Kororoit Creek area in 1840-41, and occupied 8,444 acres from September 1845, having purchased the licence to the Chamois Ponds or Chain of Ponds run on Kororoit Creek. Destroyed by fire 1840's. Kororoit Creek Rockbank 1841- James Pinkerton. The home station was located on the banks of Kororoit Creek about half way between Anderson's and Yuille's Runs. No buildings survive on the site but early maps show structures marked shearing sheds on the north side of the creek at roughly Grid Ref CU015205, and huts further west at Grid Ref. BU995209.
8	Chamois Ponds	The homestead was of wattle and daub lined with hessian of green baize in the better rooms. It was said to have been erected by unskilled labour. The site was one frequented by Aborigines who were given boiled rice with sugar by the Pinkertons, in a quart pot usually used for sheep dip but which was cleaned for the occasion. The house burnt down in 1848 and the family moved to "Yaloke" on the Werribee River. However, Pinkerton had purchased only the 640 acre pre-emptive right on Kororoit Creek (Section 27 lot 1) in the land sales in the Parish of Derrimut and much of his leased land was absorbed by Clarke's Grass Right which he was due from the rights of his Special Survey. Even Pinkerton's 640 acres of freehold were eventually sold to Clarke Pastoral Properties Grazing on the Keilor – Werribee Plains Gary Vines 1993

Any	Donegal	Common Names by Ancestry
Any	Drogheda	Common Names by Ancestry
11	Dunbar Ponds	Originally taken up by settlers by 1841. The vagaries of flood, drought and economic depression forced most to depart. By mid 1850's Clarke had acquired all these farms and more. In 1861 he had 170,000 acres. Dunbar of Mt Cottrell, first recorded manager, began process of draining the low-lying swamp land in this area.
Any	Dunboyne	Common Names by Ancestry
Any	Dungarvan	Common Names by Ancestry
Any	Dunvegan	A bluestone cottage of four rooms, which had been erected as the Melton Police Station in Smith St, Melton in 1875. Later the home of Mrs M McPherson. After 1937 was purchased by Mr GH Dodds, owner fo the Golden Fleece Hote and became the Mechanics Institute Library, then a dwelling house, then a Civil Defence Headquarters before being removed to the Willows Historical Park.
Any	Eastbourne	Common Names by Ancestry
3	Edwards	
Any	Esker	Common Names by Ancestry
2	Exeton	From 'exe' the original name of Werribee River and 'ton' meaning farm or hamlet also ending of 'staughton'
2	Exeviews	From river exe and views from the area over the river
2	Exford Run	Exford Homestead plus 'run'
2	Exstead	From 'exe' and from 'stead' meaning place
Any	Farrelly ?	John Farrell brought Melton Park and farmed sheep, hay & Oats. Land was later sold to the government for soldiers settlement.
9	Fieldstone^	In the 1850's the area was surveyed for township sites, however the rocky terrain did not encourage successful subdivision. Contractors engaged in the road making and stone wallers carted away large quantity of surface rock the area was then used for grazing. Post WW2 subdivision for small farming was successful.

11	Pinkerton	Historical Note: James and Margaret Pinkerton & Family left Glasgow, Scotland on 8 July 1839 - sailing from Greenock on the Barque "Superb". They arrived at Port Phillip on 4 December 1839. In 1840 they settled in the Keilor District on a property called "Chamois Ponds". In 1848 the property was burnt-out and the family moved to the Werribee River, settling on the new property "Yaloke". In 1855 Margaret Pinkerton died & was buried in Pinkerton Forest. Between 1857 & 1860 4 grandchildren died (aged 9,8,1 & 2 years) and were also buried in the forest. A cairn was erected over the graves in 1931. After adverse times W J Clarke ("Big Clarke") acquired the property in 1862 and James Pinkerton retired to Bacchus Marsh where he died in 1869.

**Shortlisted Suburb Names List**

*Names shortlisted for community consultation by advisory Committee.*

Suburb Area	Proposed Suburb Name	Meaning
11	Deanside	Deanside Shearing Shed within suburb area. State listed site VHR H810 – Victorian Heritage Register Melton Heritage Study
	Dunbar Ponds	Originally taken up by settlers by 1841. The vagaries of flood, drought and economic depression forced most to depart. By mid 1850's Clarke had acquired all these farms and more. In 1861 he had 170,000 acres. Dunbar of Mt Cottrell, first recorded manager, began process of draining the low-lying swamp land in this area.
	Pinkerton	Historical Note: James and Margaret Pinkerton and family left Glasgow, Scotland on 8 July 1839 - sailing from Greenock on the Barque 'Superb'. They arrived at Port Phillip on 4 December 1839, and in 1840 they settled in the Keilor District on a property called 'Chamois Ponds'.  In 1848 the property was burnt-out and the family moved to the Werribee River, settling on the new property 'Yaloke'. In 1855 Margaret Pinkerton died & was buried in Pinkerton Forest.  Between 1857 & 1860 4 grandchildren died (aged 1, 2, 8 & 9 years) and were also buried in the forest. A cairn was erected over the graves in 1931. Recommendations

Suburb Area	Proposed Suburb Name	Meaning
	Chamois Ponds	<p>1st Homestead of the Pinkerton Family on the Kororoit Creek, Sinclair Road Area.</p> <p>James Pinkerton arrived in Port Phillip in 1839. He held a grazing licence in the Kororoit Creek area in 1840-41, and occupied 8,444 acres from September 1845, having purchased the licence to the Chamois Ponds or Chain of Ponds run on Kororoit Creek. Destroyed by fire 1840's.</p> <p>Kororoit Creek Rockbank 1841- James Pinkerton. The home station was located on the banks of Kororoit Creek about half way between Anderson's and Yuille's Runs. No buildings survive on the site but early maps show structures marked shearing sheds on the north side of the creek at roughly Grid Ref CU015205, and huts further west at Grid Ref. BU995209. (Pastoral Properties and Grazing on the Keilor Plains By Gary Vines 1993).</p>
	Stansford	-
	9	Fieldstone
	Kalkara	Common Names by Ancestry, Malta
	Mount Atkinson	Melton Dry Stone Wall Study
5	Mackintosh	<p>Donald Macintosh from Rockbank was Australia's first Olympic Champion. Historical information available).</p> <p>Won the first Australian Gold Medal in shooting, a feat that took 90yrs to be recognised. He won at the Paris 1900 game shooting event, but there was confusion at the time as to what events were included. Eventually acknowledged that Mackintosh won the game shooting event, and finished third in the live pigeon shooting (next medal in Shooting not won until LA 1984).</p> <p>(International trap shooting champion, born at Rockbank September 1866. Family lived east side of Toolern Creek and afterwards his father moved to Rockbank. All that remains of 'Oak Park' site on Mount Cottrell Road is some old pine and pepper trees.)</p>

APPENDIX 4

Suburb Naming Project Community Engagement Campaign & Response

**Campaign**

*"Got a better suburb name?"*

Seeking to inform the community of the suburb naming project and to encourage participation in the selection of names and boundaries, Council pursued a humorous campaign in which people were encourage to suggest "a better suburb name". Investment in strong creative and design was deemed necessary to ensure awareness and response.

**Promotional schedule**

Engagement method	Description
Addressed mail out	Personally addressed Council letter to 'directly affected' ratepayers and residents
Key stakeholder letter	Formal Council letter to developers & key stakeholders
Information posts	Static displays at major shopping centres
Unaddressed mail out	DL sized information flyer & free postage voting slip to 'non-affected' households
Public meeting	Community hall meetings for discrete communities x 7
Rates notice insert	DL sized information flyer & free postage voting slip in all rate notices
Moving Ahead magazine	Article within quarterly Council newsletter to all residents
Council website presence	Homepage link to further information and news pages including online comments
Facebook advertising	Facebook advertising to Melton and surrounding suburb users
